Indonesia  
Namibia

## NEXT STEPS

Contact HATS Consulting to  
discuss how we can assist  
you with the next review or  
audit of your tailings or water  
storage facility.

## BEYOND COMPLIANCE

The main objective of audits and reviews of water or tailings storage facilities is to confirm that they are managed safely and effectively throughout all life phases. They are an essential part of a dam safety management system and as such they are imbedded in the compliance frameworks of owners and regulators.

In our audits and reviews, HATS goes beyond compliance by providing owners with a meaningful understanding of their facilities and practices. We aim to provide practical recommendations to optimise operations, reduce risks and potentially reduce operating costs.

## GLOBALLY ENCOMPASSING

HATS will complete audits and reviews of your storage facility irrespective of the size or location of your organisation and in accordance with your internal or regulatory guidelines.

Whether your operations are in the Arctic Circle or a tropical region, in an arid zone or an extreme rainfall environment, our audits and reviews will address the needs of your project and align with the site-specific operating conditions.

## INDUSTRY LEADERS

We are directly involved in shaping numerous regulatory frameworks including ANCOLD Guidelines, ICOLD bulletins, ICMG Guidance Notes and have cooperated in development of the CDA guidelines.

Through our involvement with these frameworks and guidelines we understand the underlying intent and the wider context of the requirements and recommendations used in audits and reviews. This deep understanding allows our reviews and audits to go beyond compliance and provide true benefits.

## OUR SERVICE

HATS aims to maximise value to our clients through integrity, honesty and delivery on our commitments.

We deliver audits and reviews in a succinct and tabular report format, allowing the reader to easily identify the outcomes and recommendations of our work. We also provide ongoing support to help you achieve the outcomes required for your storage facility and operations.
