

# Technology and Information at Northstar Capital Management

## Access Your Information in a Way That Suits You

At Northstar we maintain the highest standards of information security and privacy protection in order to communicate with clients most effectively. Therefore, we have created enhanced reporting statements that provide our clients with detailed account information in a format that we believe is clear and comprehensive. Our goal is to make it easy for clients to access their information in a way that suits their tastes and needs.

## Client Engagement Redefined

As our clients' lives become increasingly digital we have invested in continually enhancing our online capabilities in order to provide them with ease of access to their financial information. Our web-based client interface platform further supports our desire to offer full transparency. Among other things, our interface platform provides clients with the functionality to view and download specific reports and information that we believe are useful and important such as transactions and holdings information.

## Client Portal

We understand the importance of being able to access real-time information about our clients' portfolios and have launched a client portal to better interact with clients. The client portal provides our clients a secure document vault to send, receive and archive documents.

## Download our Mobile App

We understand the importance of being able to access real-time information about our clients' portfolios and have launched a corresponding mobile app that is available for download on both Android and Apple devices. Download the app and begin a mobile experience that includes interactive performance reports, a document vault for PDF reports, videos and other content from our firm.
