The Paisley and West Glasgow DAB small-scale multiplex covers a population of 316,880.

Radio stations or online webcasters wishing to broadcast their service via a small-scale DAB multiplex need to apply broadcasting regulator Ofcom for a Programme licence.

Simply DAB transmits using DAB+ an improved version of DAB that uses the HE-AAC v2 (AAC+) audio codec. This provides improved coverage and sound quality.

We invite applicants from any Ofcom licensed radio service, webcaster, or any other audio provider to register their interest by emailing: info@simplydab.co.uk
