VER.2026Q3

WellTech Industry LLC headquartered in Dallas, is a manufacturer specializing in waterproof lighting fixtures. With in-house assembly workshops, a dedicated R&D department, and a professional engineering team, our end-to-end setup enables us to deliver fully customized, comprehensive lighting solutions.

Backed by over 12 years of industry expertise, our products are built to perform in harsh and highly specialized environments. For more than a decade, our engineers have refined fixtures for car washes, mines, swimming pools, resort exteriors, convenience stores, and virtually all outdoor or moisture-prone applications. Including regions facing extreme heat or freezing temperatures. We also serve commercial, industrial, and residential projects, consistently exceeding expectations.

Quality is non-negotiable. Our products are ETL and FCC certified, and tested to IP68, IP69K, and IK10 standards, ensuring they meet the highest levels of performance and safety. This reliability comes from our complete control over the production process, from selecting premium raw materials to final manufacturing, ensuring superior resistance to corrosion, water, and impact.

We provide cost-effective customization and top-tier after-sales support, including direct assistance for electricians and installers to ensure smooth, hassle-free installations. Looking ahead, we will expand our Dallas assembly operations soon to offer faster lead times and even more responsive support for local clients.

Choose WellTech Industry LLC for certified, cutting-edge waterproof lighting designed to illuminate and endure, even in the most demanding conditions.

TABLE OF CONTENTS

01	Tunnel Lighting	3-10
02	Boom Lighting	11-12
03	Heavy-Duty Tunnel Fixtures	13-14
04	Building Lighting(Accent Lighting)	15-17

Welltech's Strengths

- Smart & Simple Control - DMX programming, app control, wireless, and remote options.
- Quality in Every Detail -- Premium materials engineered to be corrosion-proof, waterproof, and impact-resistant
- Affordable Customization-Choose your colors and options without added cost.
- Trusted Expertise - Deep niche-industry experience backed by reliable after-sales support.
- Lasting Value - Engineered to deliver performance that makes every dollar count.

SINGLE SOLID COLOR WAVE TUNNEL LIGHTS

IK10 IP69K

Product Features

- Premium material: Corrosion-resistant materials, chemical & flame-resistant, specifically designed for carwash environments
- Single solid color options: Red, green, blue and so on + custom solid colors available
- Superior performance: CREE LEDs and cutting-edge design
- Lightweight & easy to mount: Compact build for hassle-free installation
- Low maintenance: Long-lasting, worry-free operation
- Plug-and-play setup: Saves time and reduces labor costs

EXTREME WEATHER-RESISTANT FULLY WATERPROOF ACCENT LIGHTS

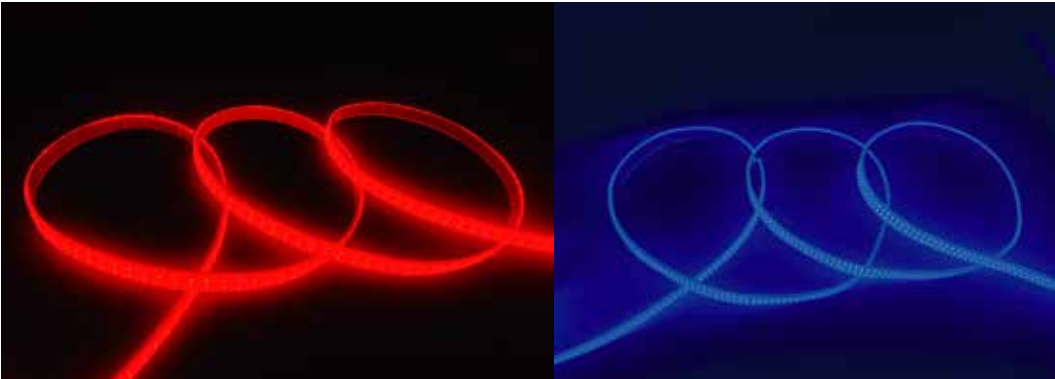

Product Features

- Industrial-grade design with food-grade silicone and UV protection
- Exceptional waterproof performance: IP67 / IP68
- Seamless extrusion molding
- Flexible color options: Single color, RGB, SPI, DMX, or custom colors for any lighting scene
- Multiple mounting methods: Stainless-steel clips, aluminum channels, or PC channels
- Wide operating temperature: -30°C to 85°C (-22°F to 185°F), engineered for high-temperature environments

PROJECTOR

Delivers an ultra clear image or pattern with outstanding brightness,ideal for logos, slogans, and advertising visuals. Its high-quality optics and powerful light source ensure sharp, eye-catching projections.

Product Features

- Retail – Promote offers or display brand logos
- Exhibitions/Trade Shows – Highlight booth branding
- Outdoor Advertising – Project onto buildings or outdoor surfaces
- Events/Parties – Create themed visuals
- Museums/Galleries – Support displays or spotlight exhibits

APPLICATION

WELLTECH DMX WIRELESS HUB

WellTech's Cutting-Edge Wireless Technology

- All-in-One wireless hub
- Fixture-Built-in wireless function

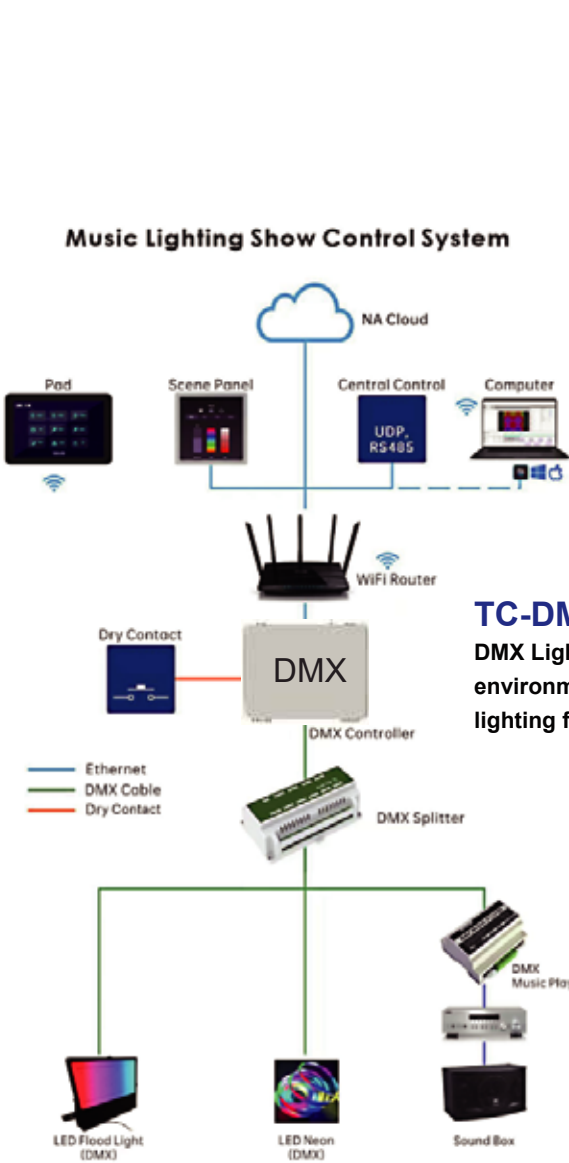

With WellTech's integrated wireless hub,eliminate complex signal wiring, slash labor costs, and simplify installation.

Ideal for both new construction and retrofitting projects.

Experience effortless setup and rock-solid reliability with WellTech's wireless lighting solutions. Engineered to streamline your workflow.

DMX LIGHTING CONTROL SYSTEM

TC-DMX-BOX

DMX Lighting Controller is purpose-built for car wash environments, offering precise and dynamic control of lighting fixtures to attract foot traffic for your business.

TC-DMX-MINIBOX

Product Features

- Local DMX Programming Controller with Remote
- Supports Up to 512/1024 Fixtures (Flexible Scalability)
- 50 pre-installed premium lighting modes, users can also customize their own lighting modes.
- Reliable Signal Transmission Within 150 Meters
- Professional Programming Support by WellTech Engineering Team

MASTER CONTROL

Master + Sub Controller Configuration:
Ideal for Large-Scale Commercial
Spaces with Extended Coverage

SUB-CONTROL

Versatile Operation Modes: PC Software Control or Built-in
Display + Button Panel for Effortless Manual Adjustment
Professional Programming Support by WellTech Engineering
Team

OUTDOOR LED DISPLAY SERIES

Product Features

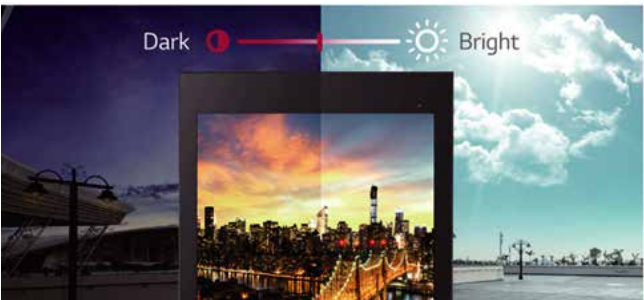

- Model Options: P2.5 | P2.976 | P3.076 | P3.91
- Refresh Frequency: 1920/3840/7680Hz
- Engineered exclusively for outdoor applications, WellTech's outdoor LED displays offer flexible modular customization, Effortlessly configure modules to match your exact size requirements.
- Boasting high refresh rates (up to 7680Hz) for crisp, flicker-free visuals, these displays deliver

APPLICATION

OUTDOOR 43"/55" DIGITAL MENU BOARDS

- High brightness: Clear visibility in direct sunlight
- Wide viewing angle: No distortion from any position
- Weather-resistant: Reliable operation in extreme temperatures & rain
- Low power, long life: Fan cooling & smart temp control, reduces maintenance costs
- Fast response: No motion blur for videos/animations
- Easy maintenance: Modular design for quick repairs

APPLICATION

Welltech: Recover. Reuse. Recycle.

Empowering a Sustainable Future.

A premier reverse supply chain and electronics recycling company headquartered in Dallas, Texas. We help enterprises maximize asset value while minimizing environmental impact through end-to-end lifecycle management solutions.

R2 Certified ISO 9001 ISO 14001 Dallas, TX

1 About Us

Founded and headquartered in Dallas, Texas, Welltech is a technology-driven company specializing in reverse supply chain management and electronics recycling. We serve OEMs, enterprise customers, and organizations across the Technology, Electronics, and Telecommunications (TET) industries who seek responsible, compliant, and value-maximizing solutions for their end-of-life and surplus technology assets.

As the circular economy accelerates globally, Welltech is launching comprehensive recycling operations from our Dallas facility, offering full-service asset recovery, data destruction, component harvesting, and certified material recycling. Our mission is to transform electronic waste into renewed value — protecting both our clients' bottom line and the planet.

Our Mission

To deliver innovative reverse logistics and recycling solutions that maximize asset residual value, ensure data security, and drive the global transition toward a circular economy.

Our Vision

To become the most trusted electronics recycling and asset recovery partner in North America, setting the standard for sustainability, compliance, and operational excellence.

2 Our Services

LOGISTICS

Reverse logistics management — nationwide pickup, secure transport & chain-of-custody tracking from your facilities to our Dallas processing center.

TESTING

Comprehensive testing & diagnostics — functional assessment, grading, data wipe verification & quality certification for every device.

REPAIR

Refurbishment & repair services — component-level repair, cosmetic restoration, software reloading & resale-ready preparation.

RECYCLE

Certified e-waste recycling — secure data destruction, material recovery & responsible disposal in full compliance with R2 standards.

3 Our Recycling Process

1

COLLECTION

Scheduled pickup & secure transport from client sites to our Dallas facility

2

ASSESSMENT

Testing, grading & triage — determine reuse, repair, or recycle pathway

3

DATA SECURITY

Certified data wipe or physical destruction with audit trail

4

RECOVERY

Refurbishment for resale or component harvesting for parts reuse

5

RECYCLING

Certified material recycling with zero-landfill commitment

Industry Solutions & Sustainability

Tailored recycling programs for every industry — backed by certified environmental standards

4 Industry Solutions

MOBILE DEVICES

Smartphones, tablets & wearables — data wipe, refurbishment & resale through certified channels

ENTERPRISE IT

Servers, networking gear & IT assets — secure decommissioning, data destruction & asset recovery

BATTERY & NEW ENERGY

EV batteries & energy storage systems — safe handling, testing & material recovery

CONSUMER ELECTRONICS

Home appliances & electronics — component recovery, material separation & responsible recycling

5 Why Choose Welltech

Certified Compliance

R2, ISO 9001 & ISO 14001 certified — full audit trail & chain-of-custody documentation

Data Security

NIST 800-88 compliant data sanitization — certificates of destruction for every batch

Fast Turnaround

Streamlined Dallas-based processing — typical turnaround of 5-10 business days

Value Recovery

Maximize residual value through refurbishment, parts harvesting & resale channels

Dallas HQ & Facility

Strategically located in Dallas, TX — central logistics hub serving all of North America

Zero-Landfill Policy

Commitment to zero-landfill — all materials recycled or repurposed responsibly

6 Sustainability Commitment

At Welltech, sustainability is not just a service — it is our core identity. As we launch our recycling operations from Dallas, we are committed to building a truly circular electronics economy where no device ends up in a landfill.

Circular Economy

Recover, reuse & recycle — extending product lifecycles

Zero Landfill

No e-waste to landfill — 100% material recovery goal

Carbon Reduction

Measurable CO2 savings through reuse vs. new manufacturing

R2 & ISO Certified

ISO 9001, ISO 14001 & R2 responsible recycling

Transparency

Full audit trail & environmental impact reports

Community Impact

Local job creation & environmental education in Dallas
