

Still getting tons of spam in your Email Inbox? Is the bank telling you they need your password? With Managed EMAIL, you'll know right away which emails are safe.

Your First Defense from a Cyberattack

When it comes to the number one attack vector, Email is the highest risk to infection from malware, ransomware, zero-days and other evil binaries that exist. With the increase in email born attacks there is a call for a new defense against these types of attacks. Managed EMAIL is a cloud-based email security solution that blocks spam, malware, and — most importantly — phishing attacks. Utilizing computer vision, artificial intelligence, and machine learning, Inceptus catches everything. Driven, curious, mobile, and growing smarter by the subject line, Managed EMAIL adds a thin—but powerful— layer of protection like no other.

DEPLOYS QUICKLY

Our staff integrates the services quickly and easily into Office 365, Exchange, or G-Suite organization-wide within an hour.

PROTECT AND TRAIN

Warning Banners appear directly in the email, offering guidance for suspicious emails.

SOC MONITORED 24x7x365

Our expert analysts are there to provide complete visibility and tracking of threats being blocked and verified.

USER-FRIENDLY WARNINGS

Safe/Unusual/Malicious warnings let users know how to safely treat the mail

Managed EMAIL Features

Email is protected on desktop and mobile.

- All incoming mail is automatically checked against over two dozen computer vision and text analysis models that “see” the message ,much like a person would—so even very convincing forgeries get blocked.
- Protects against both spear phishing and brand forgery attacks.
- Deploys organization-wide within an hour.
- Works with any mail client, on any device.
- “Report Phish” link in the email sends the mail to the Inceptus Security Operations Center (SOC).
- HTML Sanitation blocks XSS, JavaScript and CSS attacks.
- Real-Time Analysis engine does not slow down mail delivery.
- All events are monitored and verified 24/7/365 by highly trained SOC Analysts.
- Banners in the email header immediately notify you what’s safe and what’s not.

Designed to Fit Any Organization

Our approach to core security focuses on bringing best-in-class continuous security monitoring and cyber security software married with highly trained security analysts. The Managed EMAIL service is designed to plug into any enterprise and become or augment your security team. We provide 24x7 monitoring and alerting of all security events happening within your environment.
