1 SPACE CONFIGURATION

Outdoor kitchens have become a fixture in the backyard. When building, you want to consider the size of your patio, deck or space where your outdoor kitchen will be located. It is important to make sure that the outdoor kitchen footprint is proportional to your space - providing enough room to walk around and congregate. The three most common outdoor kitchen configurations are Straight (S-Series), L-Shape (L-Series) and U-Shape (U-Series). The following Standard Layout and Options guide combines these configurations with different appliance packages.

STRAIGHT ISLAND

S-Series

Straight outdoor grill stations or islands are perfect for small spaces. They can be built on patio's perimeter or along an existing exterior wall. You can also add a detached, parallel bar or refreshment station.

L-SHAPE BAR-ISLAND

L-Series

L-Shape outdoor kitchen/bar-islands, similar to a Straight island can work well in small to medium size spaces and can be located on perimeter of a patio. L-Shape layouts are a great way to add convenient prep and bar space.

U-SHAPE KITCHEN

U-Series

U-Shape outdoor kitchens are the ultimate in prepping, cooking and entertaining outside. A U-Shape requires a medium to large space. The U-Shape also offers convenience of all appliances, utilities and components in one place.

2 GRILLS & APPLIANCES

The Outdoor Kitchen is the “heart” of the Outdoor Room and a key component in outdoor entertaining and leisure. Your outdoor kitchen addition should be well thought out. What will be the typical usage? How many people will use it on a regular basis? When entertaining guests, how many people will you need to feed? Having the right grill and appliances is essential to getting optimal use and enjoyment out of your outdoor kitchen space. Please find description's below of our silver, gold and platinum packages.

SILVER PACKAGE

Built for value and utility with room for adding onto later. The Silver Package is a great way to start enjoying an outdoor kitchen without breaking your bank while giving you the flexibility to upgrade* in the future.

- Cooking, Preparation and Storage Space standard features
- Refrigerators equipped in larger L and U Shapes

GOLD PACKAGE

Offers value, upgraded features and overall best bang for the buck by providing more cooking, storage and refrigeration spaces. The Gold package is designed to be fully expandable down the road.

- Cooking, Refrigeration Preparation and Storage Space standard
- Multiple Cooking surfaces
- Additional Storage equipped in larger S, L and U Shapes

PLATINUM PACKAGE

Offers all the bells and whistles of a custom outdoor kitchen without the custom price. The Platinum Package is designed to optimize the outdoor kitchen island/bar space for functionality and enjoyment.

- Cooking, Refrigeration Preparation and Storage Space standard features
- Multiple Cooking surfaces in most
- Additional Storage equipped in larger S, L and U Shapes

A letter from Coyote Outdoor Living:

Coyote Outdoor Living's passion for design, value and the outdoor lifestyle is demonstrated in our outdoor culinary and entertainment products. All of our grills are built with premium grade 304 stainless steel throughout and have features such as double-walled stainless steel hoods, cast stainless steel burners and zinc nickel alloy knobs. We are proud to offer durable products at great values so we can enable all outdoor chefs and enthusiasts to build the outdoor kitchen of their dreams.

3 STRUCTURE DESIGN

It is important to consider the environmental stress and climate, when building the outdoor kitchen structure to house your grill, appliances and storage. Using materials engineered for the outdoors is critical to long term durability and enjoyment. Additionally, you will want to consider an aesthetic look that will compliment your existing landscape and home. Our kitchens come in several timeless stone profiles; Ledge Stack, Dry Stack and Random Rock with a number of different color options.

STONE STYLES

Ledge Stone

Dry Stack Stone

Color Options

ClifRock Panel Masonry Technology™

ClifRock Engineered Stone Panels provide the traditional look of stone without the added cost or property disruption. ClifRock offers a frameless panel system made from a polymetric, fiber reinforced, high-performance concrete ensuring strength and performance under extreme environmental stresses. ClifRock panel system was designed and engineered to be a faster, simpler and more efficient way to build outdoor kitchen structures.
