connecting people with jobs

Created in Victoria, hi-er is serving our community and connecting people with jobs. We are passionate to support local businesses in their efforts to attract a diverse workforce that represents where we live and operate.

We are re-inventing the way you recruit by saving you time and resources through an innovative community focused application.

With over 30 years of combined expertise in human resources and recruitment, we partner with our clients for customised solutions.

What is the hi-er app?

We've created an easy to use app that asks our users how they like to work and their skills in an engaging format. With our matching algorithm we can map their location, work preferences and experience to target related local job opportunities. Saving them time from searching on traditional job boards.

How does it work for local businesses?

You can post a job through the hi-er portal. The job opportunity brief is then distributed to the app users based on their preferences and settings. Users are guided to the job opportunity for review and to register their interest. Once a match is created between the person and the job, employers are able to engage with the applicant directly.

Unique algorithm to match people to local jobs based on key criteria:

Location

Preferences

Skills

**Let's create a
hi-er future,
together.**
