- **WorkZone Course Requirement:**

Oklahoma has a new requirement. Oklahoma law: HB1962 – Requires a completion certificate of the free online ODOT course on work zone safety to be submitted prior to issuance of an Intermediate License. Title 47:6-105(D)(1)(c)

The free course is accessed at

<https://work-zone-safe.teachable.com/p/about>

Make sure the student uses an accessible email to create an account and be sure to choose the Oklahoma course, not the national course.

We encourage students to complete the course and save the certificate they receive from the course to show the DPS when applying for their license. Please let me know if you have any questions regarding our class or the Work Zone course.
