ABOUT US

Hello & Welcome to G.M. Sewing Company

My name is Maya, I am co-owner and head fitter at G.M. Sew Co., and am so happy that you are here. I just wanted to give you a little information about our company before we begin.

Currently, we are a team of 4. We focus on bridal alterations and a line of wedding gowns as well as bridal accessories. Between us, we have 30+ years of experience all being used to make your dress fit perfectly.

OUR PROCESS

WHAT TO BRING

Your Dress

Your Shoes. Please bring them to every fitting.

People who you feel like you can advocate for yourself in front of.

Please do not bring more than 2 guests with you.

Take some time to think about your dress, maybe even put it on at home and come in with some ideas of how you want it to look and feel. Our fittings have to stay really focused because changes will be made to your dress as soon as you leave. The more decisive you are in the beginning, the more you are going to enjoy the process throughout, and the happier you will be with your dress at the end.

LOCATION

G.M. Sewing Company is located at 47 Maple Street in Suite 224 in downtown Burlington.

When you arrive, enter through the front doors, take a left and take the elevator or the staircase to the second floor. Take a left out of the elevator and go down the long hallway past the restrooms. You will find our studio at the end.

If our building is locked when you arrive, please text or call our business number 802-910-8641 and our studio coordinator will come down and let you in.

PARKING

Perkins Pier: Metered Parking

South Champlain Street (towards the dead end): Free 2 hr Parking

Maple Street: Free 1 hr/30 min Parking

Please do not park in the back lot or the front handicap spot. You can park in the two loading/unloading spots in the front of the building if they are available.

WHAT CLASSIFIES AN ALTERATION?

ALTERATION vs. REBUILD vs. DESIGN

Alteration

We consider it an alteration when the dress is within a two inch range of fitting your body correctly (specific to fit, not to hems)

Rebuild

A rebuild is when the dress is over or under 2 inches from the correct size. In a lot of cases, when we have to take that much in (or let that much out) we have to take the dress apart and individually grade each piece so that the proportions stay correct.

Design

Changing the shape, silhouette or certain functions of the dress fall under the design category. For example making a sleeved gown, strapless is no longer an alteration, but a design change. This affects the timeline and falls under a different hourly rate.

PRICING

First Appointment: \$65

Additional Appointments: Prorated \$55/hour

Studio Alteration Rate is \$55 per hour

Studio Design Rate is \$75 per hour

After filling out our new bride questionnaire, you will be sent a range as to what we think the cost of your project will be. At the end of your first fitting, we will go through the estimated time for your project and give you a better idea of what the cost might end up looking like. We ask for a 50% deposit at the end of your first fitting, and the rest will be paid in full when you come to pick up your dress.
