

How To Embroider A Baseball or Softball

Baseball

Any Ball: Leather or Synthetic

Take Apart

Use Seam ripper or Scissors
Only cut red thread

Remove Ink

Depending on how many panels you areas would like to use

Panels

Each panel is divided into 3 sewing areas Top, Middle, Bottom.... Remove the areas of Ink you would like to use

Digitize Design

3 balls /6 panels

10x19 Hoop

1.5 Cutaway/Tearaway
You can use smaller hoops

Stitch

Option 1: Outside Run, stop machine, place panel, inside run stitch = No glue
2nd Option for no lines on balls is to spray glue on back of panel and place on top of run stitches.

Thread

Buckleguy.com Ritza 25 Tiger Thread

1.2mm 87 inch =1 baseball
around 115-120 Inches = Softballs

Equipment

2 Needles: Round or Straight:2"Blunt Embroidery Needle Ball
Gadget:Mycustomballs.com

Spray Panels

Spray Glue to the back of the panels, let it get sticky prior lining up the logos if you still have them facing the same way. This glue allows you to reposition if needed

Sew

1 thread 87": 1 needle on each end, start inside out, right diagonal then left diagonal. Adjust on the ball gadget as needed....

The Ball Gadget

Patent Pending

Thank you for your business!

This Ball Gadget was created for my wife who was making custom baseballs... like the good husband, I protyped 4 versions to get the portability, lite weight, hand placements, ball adjustments, needle holder and thread measurer just right for the everyday Ball Sewer.... Whether you are sitting on your couch watching Tv, at your desk or a great baseball game watching grandkids, we hope this ball gadget and kit will help bring many smiles to those whom receive your Custom Ball.
