

# ***MDT MAINTENANCE/STORAGE BUILDINGS***

***BOZEMAN, BELGRADE, SHELBY, GLASGOW, BUSBY, MONARCH, ROY***

## **Project Description**

Three Rivers Engineering designed the mechanical and electrical systems for multiple Montana Department of Transportation Buildings.

Lighting includes high efficient LED systems and energy saving controls. High efficiency boilers were used to heat the administration and maintenance buildings using radiant floor heating. Shop areas were ventilated using gas fired make up air systems.

## **Project Highlights:**

- High efficiency LED lighting
- High efficiency boilers.

## **Project Details**

Completed: Spring 2016
