# Bridal Journey

By Aditi Shah

## **What inspired your wedding theme or concept, and how did you bring it to life?**

As I am a person who love simple and elegant things not a one who show off things. So I selected a descent royal theme for marriage. Funky for haldi and traditional for Ganesh puja.

## **Share with us one unexpected detail or element from your wedding that made it truly memorable.**

My Jaymala

It's was best precious moment of my life. It was magical and unbelievable. I wasn't sure that things will work in their place but everything was just perfect at perfect time. Even all the guests were also surprised and they also liked and enjoyed whole moment. I want to express more you know some moments are so magical that you don't have enough words to express.

**Can you tell us about any cultural or familial traditions you incorporated into your wedding celebrations?**

Adding touches of our culture, or thinking of ways to weave our heritage into our special day can be a really thoughtful way to make your elopement or wedding day more... you. It is a way to make our day feel more authentic and connected by honouring who you are, where you come from, and the ancestors that came before you. For when you think about it, without our ancestors, none of us would even be here! So we carried out our proper tradition and rituals during our wedding.

**What was your most challenging moment during the wedding planning process, and how did you overcome it?**

The most challenging thing was to attend the guest accommodation because there was little time between welcoming and upcoming event. It was tricky task as room where not ready and all guest arrived at the same time. But our event team managed it very well.

**What advice would you give to couples planning their wedding, based on your own experience?**

We made a last minute decision to have an on-the-day wedding coordinator and it was the best decision we made. Our coordinator was our wedding fairy godmother and made sure the day ran like clockwork. It meant that we could all truly enjoy the day without worrying about timings or the finer details

**Reflect on the significance of your wedding venue choice and how it contributed to the overall atmosphere of your special day.**

Indian wedding venues are not just spaces; they are the canvases upon which dreams are painted and memories etched. The Desert Palace offers breathtaking views of the Golden City and Rajasthan's desert landscape, making it one of the most beautiful wedding venues in all of Jaisalmer. If you're dreaming of an unforgettable destination wedding where you and your partner are pampered from head to toe, plan your special day at the Desert Palace today.

### **What do you think is the most important aspect of creating a personal connection with clients?**

The most important aspect of creating a personal connection with clients is genuine empathy and understanding. Building a strong personal connection goes beyond just providing a service; it involves truly understanding the client's needs, desires, and emotions, and empathizing with their experiences.

Here are some key components of creating a personal connection with clients:

**Active Listening:** Take the time to listen attentively to your clients, not just to understand their practical needs but also to empathize with their feelings, concerns, and desires. This demonstrates that you value their perspective and are committed to meeting their needs.

**Empathy and Understanding:** Put yourself in your client's shoes and try to understand their perspective, preferences, and priorities. Show genuine empathy for their experiences and emotions, and let them know that you are there to support and assist them every step of the way.

**Authenticity:** Be authentic and genuine in your interactions with clients. Show them your true personality, values, and passion for what you do. Authenticity builds trust and rapport, making it easier for clients to connect with you on a personal level.

**Communication:** Maintain open and transparent communication with your clients throughout the entire process. Keep them informed, address any concerns or questions promptly, and seek feedback to ensure that their needs are being met.

**Communicate Openly:** Maintain open and transparent communication with your partner, family, and wedding vendors throughout the planning process. Be clear about your expectations, preferences, and concerns, and don't hesitate to ask for help or clarification when needed.

**Be Flexible:** While it's important to have a vision for your wedding day, it's also essential to be flexible and adaptable to unexpected changes or challenges that may arise. Embrace the journey and be open to new ideas and opportunities that may enhance your wedding experience.

**Take Care of Yourself:** Don't forget to prioritize self-care and well-being throughout the wedding planning process. Take breaks when needed, practice relaxation techniques, and make time for activities that bring you joy and rejuvenation.

**Enjoy the Moment:** Amidst the busyness of wedding planning, don't forget to savor the special moments and cherish the journey with your partner. Take time to celebrate your love and the exciting journey ahead, and remember that your wedding day is a celebration of your unique love story.

# Healthy Relationship

By Priyanka Kapoor

Priyanka Kapoor, psychologist and psychotherapist and she specialize in couple and family counseling. She deal with all ages from 6 years to 60 years. She have her private practice at Marine drive, Mumbai. She practice globally online as well. Other than mental health issues like anxiety, depression, child counseling, I deal with relationships, pre-marital, post-marital, divorce and family issues as well.

## **What gap or need did you identify in the market that led you to create your product/service?**

There is extreme suffering in relationships, families and mental health which are not given equal importance as compared to physical health. People have a lot of ignorance about red flags in mental health and relationships. I feel extremely empathetic and sympathetic and feel responsible towards the society for helping them and giving them the right guidance with the help of my experience and knowledge.

**How do you ensure that your offerings provide a unique and memorable experience for couples?**

The initial session is about understanding the dynamics of the problem getting into the root cause of the problem. I have an integrated approach. I combine psychotherapy, couple therapy and family therapy, resolve the intricacies of the problem. I make sure that my therapy sessions are not unnecessarily extended and they give results as fast as possible. Infact my USP is trauma cases and self esteem cases are completed in just 2 to 3 sessions max.

**How do you ensure a personalized and memorable experience for your clients?**

I always ensure that my clients always have a positive experience and get visible results with my therapeutic tools and techniques.

**How do you prioritize sustainability and ethical practices in your business operations?**

Confidentiality and boundaries are very important which we as psychologists have to maintain in our ethical practice. This not only ruins the case but also spoils the relationship with the client. Hence I make sure to follow honesty, ethically, by abiding rules and regulations to avoid complications.

**What do you think is the most important aspect of creating a personal connection with clients?**

The most important aspect in developing connection is listening and empathizing with the client along with giving them some hope and assurance that improvement is possible. Giving them enough time and space to be comfortable is also very important.

**What advice would you give to wedding crammers readers?**

Wedding crammers can help the readers with content related to improving relationships or helping them to find the right match with good tips so that one can have healthy relationships.

I highly suggest that one should not hesitate to seek help. Before getting married either one is engaged or looking for prospects, one should always do pre-marital counseling. This helps in understanding the red flags and working on it before it gets worse
