J4t multitrack.

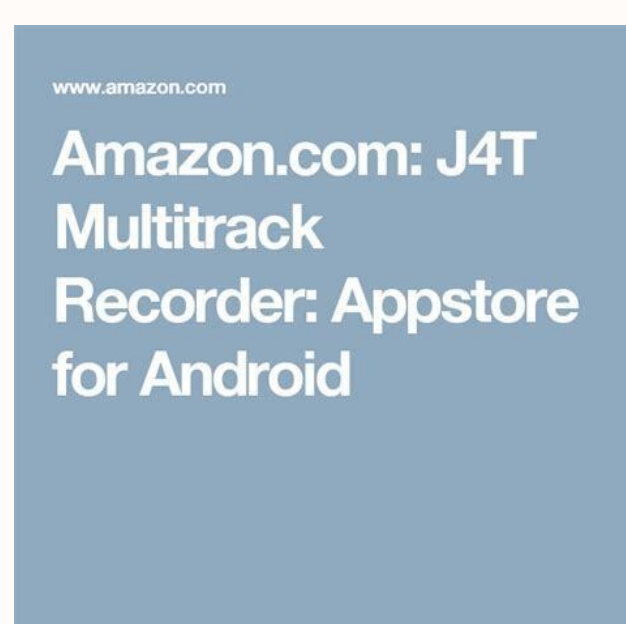

The J4T is a compact 4-track recorder, designed to capture your song ideas, demos and sound-sketches easy and anywhere. In other words: a great tool for songwriters and other creative musicians! Features: * Four tracks * Audio effects: Fuzz, Chorus, Delay, Equalizer, Reverb, Phaser, Compressor * Import/Export your own music (MP3/WAV) * Loop function * Track editing Live monitoring is supported for devices with Android 10 or higher. If you experience problems with the app, please check the F.A.Q. in the app or let us know about it by sending an email so we can try to fix it. Safety starts with understanding how developers collect and share your data. Data privacy and security practices may vary based on your use, region, and age. The developer provided this information and may update it over time. No data shared with third parties. Learn more about how developers declare sharing. No data collected. Learn more about how developers declare collection. Ratings and reviews are verified. Info outline. An app without fault, without complaint. Stable crystal clear recording, available array of effects. I use it as a 'sketch' recorder, and it is utterly perfect. It syncs easily whether you use the device external or a peripheral mic/speaker, and since download I have used it every single day (probably the only non-proprietary app where I do) and my only guidance to users would be to make sure when you leave, you open up a new project, so the 1 second it takes to open means you're ready. Did you find this helpful? Great simple app I downloaded this onto a Samsung S10+. I had low expectations, especially regarding latency. But I found it is very usable as a multi track recorder. My only issue with it was low output volume. My mic signal is good. I have to have the phone volume on near maximum to use this app. Just have to remember to turn it down for other apps @. This also happens on Moto G6 phone. No big deal! 13 people found this review helpful. Did you find this helpful? Exactly What You've Been Looking For. This app lets you record 4 simple tracks. No annoying ads, no forced social bs, just you and 4 tracks to lay down rhythm, lead, vocals, and more. It's a singer's dream. Easy to drop 4 harmony tracks with any melody that pops in your head at any time. Love the autosave feature and worry free transitions between this app and others. Well done! 418 people found this review helpful. Did you find this helpful? Fixed issues with main loop, importing 32-bit wav, and bluetooth playback. Flag as inappropriate. Nice lo-fi feel reminds me of the glory days of cassette 4 tracks. Great value for money. Bravo developers. ★★☆☆☆ I'm confused to see so many positive reviews. There's about a half a second delay in the playback of other tracks when recording a track. The only way to line up the timing is to turn on the metronome and turn down the volume on all the other tracks. This is a weird and fundamental design flaw that makes the app close to unusable. ★★☆☆☆ I like it a little bit. Not exactly all features. Eventime I align a track, it also aligns the entire track, and totally misaligns the entirety of that particular track. I tried snap and cutting, but then it connects both unsnapped, together. This is really frustrating, when u know what you want to do, but can't get it done. But then again, what can I expect for a free app. I guess the makers of this app, did not think it all through.

So, for that, I really don't like it much or not recommend it. J4T Multitrack Recorder is requesting 4 permissions and is using 12 libraries. Show details How can I download the J4T Multitrack Recorder app?

Use the button above and you'll be led directly to the Google Play store where you can install the app. How popular is J4T Multitrack Recorder?
