

## - FIRST -

The mission of FIRST is to inspire young people to be STEM innovators by challenging them to raise funds, design a "brand," hone teamwork skills, and build industrial-size robots to play against competitors. Volunteer professional mentors lend their time and talents to guide each team towards the season end at the FIRST Championship.

# - OUR STORY -

55 members  
5 mentors  
3 coaches  
1 team

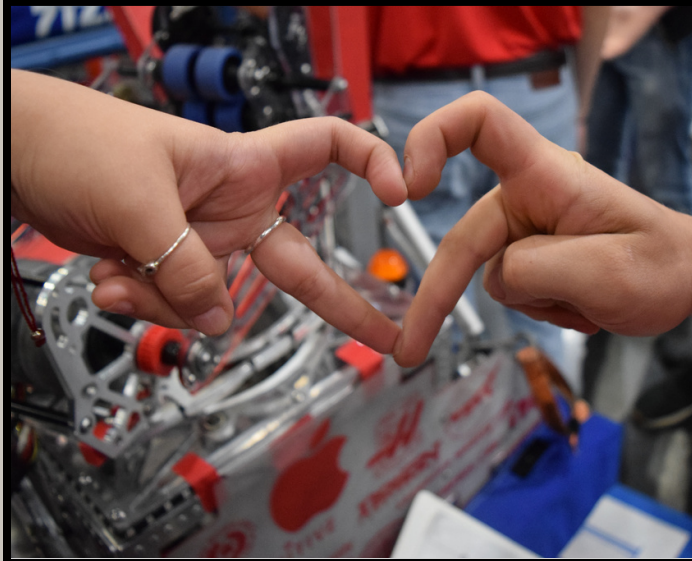

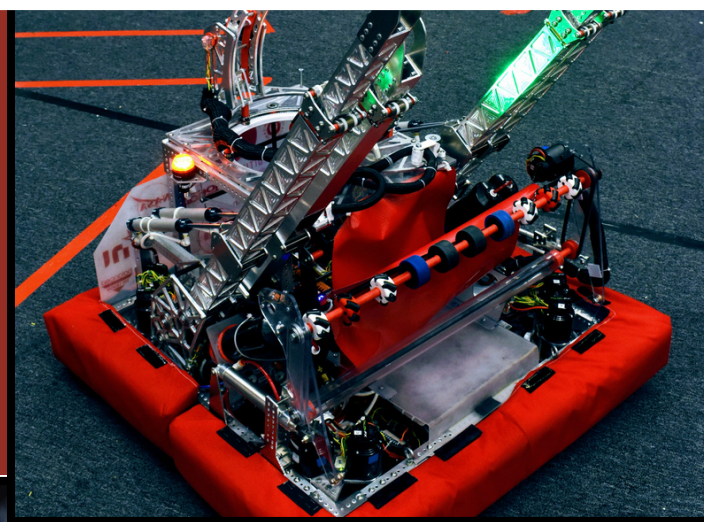

~

The ROSBOTS are a FIRST robotics competition team from San Antonio, Texas. Much like the robot shows on TV, FRC consists of students collaboratively designing, building, programming, and driving robots competitively. Through hard work and determination, our team has competed at the World Championships five times since our rookie season in 2015. For the 2022 season, the ROSBOTS competed in Rapid React and walked away with the Industrial, Autonomous, and Creativity of Design Awards which were all about the building and coding of the robot.

FRC Team #5572

## ***The Rosbots***

**“It’s the hardest fun you’ll ever have!”**
