Bracknell between the World Wars - Urban Spaces Project

Short film clips showing aspects of life, and urban and cultural development, in Bracknell during the Interwar period, 1918 to 1939.

Please use this link to view the multiple video clips:

<https://www.youtube.com/@urbanspacesproject>

Based on local history research, these film clips have been produced as part of a European Urban Spaces project in partnership with Bracknell's twin town, Leverkusen, in Germany, and six other twin towns of Leverkusen from other European countries. Together with local history film clips from other partner towns, the Bracknell film clips have been assembled into an electronic film kit which is now live and freely available online as an educational tool primarily intended for use by young adults.
