Tree Work Notice and Road Work Update

April - May 2026

Tree Work - On April 20th, Western Sierra Tree Service will come through the entire association and trim any branches that are lower than 14ft and hanging over the roadways. They will not trim anything that is past the edge of the pavement or over 14ft. The work is expected to take 1-2 days and they will remove all debris and branches. This is all expected to take one, maybe two days.

If you have questions about this or you do not wish to have the trees from your property trimmed, please contact John Bosso.

If you would like to hire Western Sierra to complete more tree work on your property while they are here, you may reach out to Miguel with Western Sierra directly (530) 957-1469. They have agreed to give GRHA residents a discount on any additional work they complete.

Buck Mountain and Grassy Run – Road repairs will begin on May 4 with the following details from our contractor Joe Vicini contractors:

- May 4 – Grinding and pavement removal on Buck Mountain. There will be multiple pieces of equipment and trucks on site and traffic will be limited and controlled all day.
- May 5 & 6 – Ditching and grading work will be accomplished. The road will not be closed, but traffic will be limited and controlled all day.
- May 7 – Paving to be completed. **No traffic access from 8am until completion of work** (no later than 5pm).
- May 8 – Asphalt work on Grassy Run from Buck Mountain down to Ruth property (as marked on the road) all day. Traffic will be limited and controlled all day.

This schedule is tentative, dependent on weather, and could change due to unforeseen problems that may arise. We will communicate any updates as we get them.
