About Us

3BEs came into existence in 2020 during the COVID'19 pandemic and sprang from a hybrid project that was the first attempt to blend two fields of science. The skillset of 3BE team included researchers, surveyors, data coders, data entry operators, analysts, and report writers. Rigorous training ensured that every member of this team must present in a thorough professional and an expert capacity. It was this team that later the project culminated into 3BE led by Engr Arbaz Adil when several members came forward to form the organization with a vision to establish new boundaries in the domain of research along with creating opportunities for young graduates. The company has since then been actively providing consultancy services in research, survey studies, impact assessment, evaluation, baseline studies, and monitoring.

Our Service

Finding common ground between academia, government and the private and third sectors lies at the heart of what we do. We help organizations implement the right systems and processes to enable excellent research, and work globally to shape improvements to scholarly communications, ensuring research outputs can be shared more effectively.

We work to pinpoint the impact arising from research, helping our clients in developing new technologies, and driving our clients with momentum in the field of research. We help universities identify and realize knowledge exchange and commercialization opportunities, and advice businesses and not-for-profits on how to harness academic expertise.

Team behind the venture

Hesham Fouad

Chief Technology officer

B.E Chemical Engineering

Expertise: AI, Arduino, Designing, Fabrication

Yasir Sheikh

Manager Incubation

B.E Chemical Engineering

Expertise: Plant Design, Analytical Troubleshooting, Computations

Muhammad Nabeel

Research Assistant

B.E Chemical Engineering (Undergrad)

Expertise: Identification, Initial Screening

The strength of the team is each individual member. The strength of each member is the team

Projects

Projects	Date	Client
Extraction of the gelling agent from seaweed	Mar 2019	Jinnah University for Women
Extraction of Chitosan	Dec 2018	Jinnah University for Women
Enhance the quality of BOPP films and its reclaim	Jan 2018	Tripack Industries Limited
Multi-cycle desiccant dryer for drying plastic	Dec 2017	UET Peshawar Concept paper
All in one surface cleaner	Feb 2017	Karachi university- Chemical Engineering Dept.
Bio-gas synthesis from leachers/domestic waste	Feb 2017	Karachi university- Chemical Engineering Dept.
Complete and Provisional Patent drafting		Jinnah University for Women
