

European Ski Vacation

Apply your skills in addition, subtraction, and multiplication to plan the perfect European ski trip for you and your friends.

Planning a European ski vacation for you and your friends.

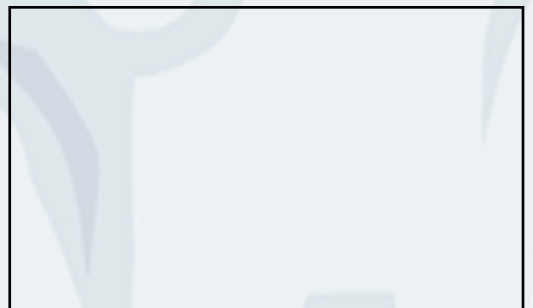

Choose a location for your ski trip:

How many friends are going on the trip?

Which country are you going to for your ski holiday?

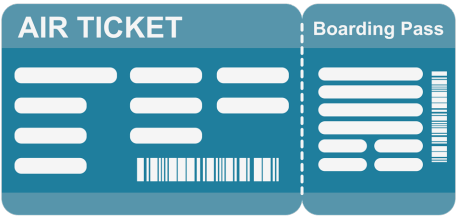

Country flag for your trip:

Fun facts about the location you chose for your European ski trip:

Getting there:

Airline tickets:

Flying from _____ to _____

Airline: _____

Cost for 1 ticket: _____

Will you need to take a bus, train, or car to get to your hotel?

If so, cost for 1 person: _____

Multiply the total cost for one person by the total number of friends coming on the trip. Show your working out below:

Total:

Accommodation

Hotel name: _____

How many nights? _____

Cost per room (for 1 night) _____

Will you and your friends each have a room, or will you share?

How many rooms do you need? _____

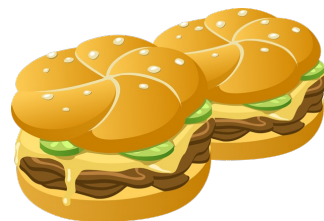

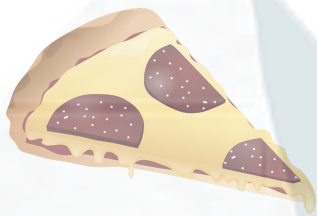

Multiply the cost for a room times the number of rooms you'll need. Then, multiply that cost times the number of nights you're staying. Show your working out in the columns below.

Cost per night (all rooms)

Cost for all rooms (all nights)

Total:

Food

You and your friends will need to eat on your vacation! You will have to calculate the costs below. Let's assume your breakfast is free from your hotel. Do some research and look at some menus. You have a very generous budget of \$2,500.

Lunch

How many lunches will you need (how many days is your trip?)

Calculate the costs of lunch for one person for all days:

Now, multiply that number times the number of friends going on the trip.

Dinner

How many dinners will you need (how many days is your trip?)

Calculate the costs of dinner for one person for all days:

Now, multiply that number times the number of friends going on the trip.

How much money will be left from you and your friends' \$2500 budget?

\$ _____

Hitting the slopes

Let's hit the slopes!

The snow is amazing here!

Name of ski resort: _____

How long are the ski runs? _____

How many times will you go down the slope? _____

How far will you ski in total (length of ski run x number of times you go down the slope)

Après Ski

You have a \$1,250 budget for fun activities after you and your friends are done skiing.

Research some fun activities nearby that you could do, then do the calculations of their costs as well as calculating how much money is left over from your budget.

Design a trip poster

In the box below design a poster that highlights your ski vacation- include drawings, information, and other features that will make it eye-catching and exciting for others to view.

Include the cost per person as well as the grand total!
