

## CONTOURING THE ABDOMEN WITH 8 TREATMENTS OVER 2 VISITS

**BEFORE TREATMENT**

**REAL RESULTS**

8 Weeks After 2nd Visit

**Results and patient experience may vary.**

Before-and-after photos courtesy of Bodify and Steven Sorr, NMD.

**Uses**

**CoolSculpting® Elite** is FDA-cleared for the treatment of visible fat bulges in the submental (under the chin) and submandibular (under the jawline) areas, thigh, abdomen, and flank, along with bra fat, back fat, underneath the buttocks (also known as banana roll), and upper arm. It is also FDA-cleared to affect the appearance of lax tissue with submental area treatments. **CoolSculpting® Elite** is not a treatment for weight loss.

**Important Safety Information**

This procedure is not for everyone. You should not be treated with **CoolSculpting® Elite** if you suffer from cryoglobulinemia, cold agglutinin disease, or paroxysmal cold hemoglobinuria.

Tell your doctor if you have any medical conditions including recent surgery, pre-existing hernia, and any known sensitivities or allergies.

During the procedure you may experience sensations of pulling, tugging, mild pinching, intense cold, tingling, stinging, aching, and cramping at the treatment site. These sensations lessen as the area becomes numb. Following the procedure, typical side effects include temporary redness, swelling, blanching, bruising, firmness, tingling, stinging, tenderness, cramping, aching, itching, or skin sensitivity, and sensation of fullness in the back of the throat after submental or submandibular area treatment.

Rare side effects may happen in 1 to 10 out of 10,000 **CoolSculpting® Elite** treatments (between 0.01% to 0.1%). One such rare side effect is a visible enlargement in the treated area, which may develop 2 to 5 months after treatment, will not resolve on its own, and may require surgical intervention for correction.
