

## Tattoo Aftercare Instructions

- Keep Second Skin on at least 2 to 5 days to get the best results. If Second Skin starts to peel off and tattoo gets in contact with air or water, remove it immediately. It's normal that fluids and ink starts to collect under the Second Skin, but if there is leakage, remove it immediately.
- If tattoo artist has put on the cling film or a glove (on hand tattoos), remove it next morning and wash your tattoo with lukewarm water (NO SOAP OR OTHER PRODUCTS). After washing the tattoo pat your tattoo dry well with paper towel or clean towel and then you can start to apply the aftercare cream.
- To remove the Second Skin use lukewarm water (NO SOAP OR OTHER PRODUCTS) and peel it off gently. Wash your tattoo carefully and don't rub it. After washing the tattoo pat your tattoo dry well with paper towel or clean towel and then you can start to apply the aftercare cream.
- **Touch your tattoo only with clean hands. Don't use any soap or other products while cleaning the tattoo.**
- After cleaning your tattoo use the Hustle Butter aftercare cream your artist has provided you. Hustle Butter is extremely plentiful so a pea sized amount will go a long way. More is not better, please do not drown your tattoo. Use just enough for the tattooed area to get shiny.
- Apply aftercare cream multiple times throughout the day. Apply 2-3 times a day, more if needed.
- The best healing method is to let the tattoo breathe so don't drown it with aftercare cream, apply only thin layer. Don't cover your tattoo too much. Make sure that your tattoo is clean all times and if you are afraid of it getting dirty or contaminated (for example while working or cleaning) cover it with cling film.
- Use only clean clothes and change your bed sheets regularly. Also avoid wearing tight clothes around the tattoo. For the first nights please be careful not to sleep on your tattoo.
- **No sauna, bathing or swimming for at least 2 weeks. No solarium/sun bathing for a month.**
- If your Hustle Butter runs out, you can buy a new one from our studio. Don't use anything that your tattoo artist hasn't approved. If signs of irritation/allergic reaction appear, switch from Hustle Butter to AQUALAN L (you can find it from pharmacy).
- Don't scratch or pull your skin or scabs that may appear.
- If symptoms like high fever, high pain (it's normal for tattoo to be sore for a couple of days) or signs of infections appear, seek medical attention immediately.
