SENIOR CONSULTING MANAGER AND HEAD OF ASEAN REGION AT KUBEROX TECHNOLOGIES

Accomplished Senior IT Management Professional with over 18 years of experience in leading complex technology transformations in multinational settings. Proven track record in spearheading major migration projects, optimizing critical processes, and delivering substantial cost savings and performance enhancements. Adept in strategic planning, agile project management, and stakeholder engagement, with a strong focus on driving technological innovation and business growth.

⭐ RECENT ACHIEVEMENTS

Project Leapp, HSBC Global

Led the high-impact migration from RHEL 7 to RHEL 8, automating the end-to-end process which included developing actors in Python, orchestrating with Ansible, and managing deployments using Puppet. Successfully migrated over 1,800 servers within two months, establishing a new standard for future migrations.

Network Infrastructure Automation, Singapore

Directed a 4-month initiative to automate network management using Ansible for firmware upgrades, daily reporting, and DR strategies, reducing manual labor by over 50% and improving network uptime by enhancing reliability and operational efficiency.

Server Patching Efficiency Enhancement, HSBC Global

Transformed server patching processes, Increased daily throughput by three times, and reduced post-patching incidents by 90% through advanced scripting and automated checks using Splunk for real-time telemetry—and, automated end-to-end patching process to avoid human errors.

Enterprise-Wide Tool Deployment, HSBC Global

Spearheaded the strategic deployment of over 20 enterprise tools and agents, significantly enhancing compliance and operational standards across a complex, multi-regional IT infrastructure. This initiative streamlined processes and enforced consistent deployment practices, markedly improving system reliability and operational efficiency globally.

💼 EMPLOYMENT HISTORY

★ HIGHLIGHTS

Leadership and Team Management

- Cultivated a culture of innovation and continuous improvement, mentoring team members and leading by example to encourage professional growth and expertise development.
- Initiated and directed a professional development program for system administrators transitioning to developer roles, significantly enhancing project capabilities and team adaptability.

Professional Development

- Actively pursuing an MS in Computer Science at Liverpool John Moores University to deepen expertise in advanced computing technologies and their application in enterprise environments.
- Regularly participate in industry conferences and professional workshops to stay ahead of technological advancements and emerging IT management trends.

Agile and Product Management

Directed multiple product lifecycles from inception to deployment, breaking down complex projects into manageable epics and user stories. Successfully prioritized product backlogs, optimized resource allocation, and maintained alignment with strategic business objectives through rigorous Agile practices.

Operational Excellence

Enhanced operational methodologies and led the deployment of 20+ enterprise tools across the HSBC estate, significantly reducing manual efforts through automation and refined deployment strategies using Puppet, Ruby, and Splunk.

Stakeholder and Customer Relations

Acted as the primary liaison between product teams, development units, and internal stakeholders, ensuring clear communication and precise requirement gathering. Regularly updated key stakeholders on project progress, overcoming roadblocks to maintain momentum and ensure project success.

Financial and Resource Management

Provided fiduciary oversight and strategic resource management, consistently delivering projects within budget and time constraints, achieving high standards of customer satisfaction and operational excellence.

Regional Leadership

Currently managing all IT consulting projects across the ASEAN region for Kuberox Technologies, ensuring top-tier service delivery and leading a team of 15 IT professionals to meet and exceed project delivery standards.
