**KRAUS USA** - Kitchen Collection 2019

[www.kraususa.com](http://www.kraususa.com)

## WHY KRAUS

For over a decade, Kraus has been on a mission to transform ordinary spaces into extraordinary kitchens and bathrooms. Inspired by the people and places around us, every innovative product is designed to support your lifestyle and bring quality and value into your home. We love what we do, and it translates every time you unbox a Kraus product. Our promise is to never compromise – all our kitchen and bath fixtures are crafted from the best materials sourced from around the globe at the best prices, ultimately giving you the best value for your money. Kraus products are built to last, but we are prepared for the unexpected, that is why we cover every fixture with a limited lifetime warranty and have customer service professionals ready to tackle any issues you may encounter. We invite you to experience the difference that our commitment to quality makes: transform your kitchen and bath with Kraus, and **Live Beautifully™**

## ENGINEERED FOR EXCELLENCE

Kraus is dedicated to making kitchen sinks and faucets into something more – something extraordinary. Every sink and faucet that bears the Kraus logo features innovative properties that set our products apart.

We focus on crafting safe and innovative products that support and promote healthy and beautiful lifestyles for this generation and the ones to come. Our dedication to sustainability includes the use of ultra-efficient components and carefully selected materials that minimize ecological impact without sacrificing on function and sensory appeal. A major part of our manufacturing process is code compliance and green certification. From precisely engineered features to proprietary technologies, we never stop working to bring you the very best. Our kitchen faucets are equipped with best-in-industry aerators that offer great performance, with an eco-friendly flow rate for minimal environmental impact. All Kraus faucets are made with lead-free brass to meet federal and state regulations, and are available in a selection of corrosion-resistant finishes that prevent damage from daily wear and tear, and will not fade over time. Our latest technological innovation is spot-free all-Brite™ finish, which resists water spots and fingerprints so your faucet maintains a beautifully polished look over time.

## all-Brite™

### SPOT-FREE ALL-BRITE™ STAINLESS STEEL FINISH

Faucets featuring spot-free all-Brite™ stainless steel finish require less cleaning and shine longer by resisting water spots, fading, and fingerprints. There is no need to wipe off your faucet after each use to keep it looking like new

## Reach™

### REACH™ PULL-DOWN TECHNOLOGY

Designed for ultimate convenience, Reach™ friction-free pull-down technology offers superior flexibility for completing kitchen tasks. The sprayhead swivel adapter allows you to effortlessly flex, pivot, stretch, and spray - and when you're done, GlideAssure ensures smooth retraction and secure docking

## Quick DOCK

### QUICKDOCK™ MOUNTING ASSEMBLY

For hassle-free installation, the QuickDock™ mounting assembly with drop-in base allows you to install your faucet from above the counter, eliminating the need to secure it underneath the sink

## SoftClean

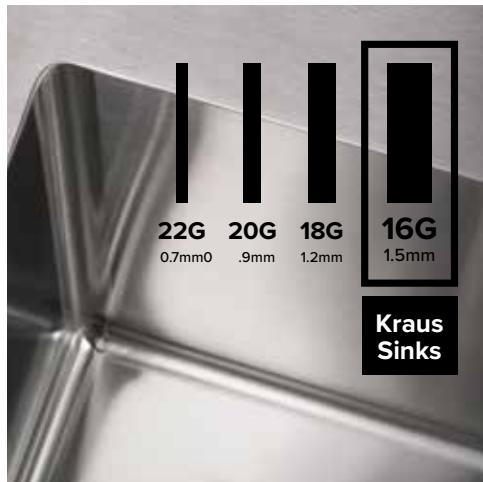

### SOFTCLEAN™ CLOG-FREE SPRAY NOZZLES

SoftClean™ rubber nozzles provide long-lasting performance and a powerful flow by resisting limescale and hard water build-up. The spray holes easily wipe clean: Renew optimal performance with just the swipe of a finger, with no need for scrubbing or harsh chemicals

### NOISEDEFEND™ SOUNDPROOFING TECHNOLOGY

The quietest sinks on the market: Our superior sound dampening technology features a non-toxic insulating undercoat and extra-thick rubber pads that cover over 80% of the sink base to prevent noise and vibration from running water and waste disposal

## TRU16

### TRU16™ REAL 16-GAUGE STEEL

Thicker steel, stronger sink: Kraus uses premium grade true 16-gauge stainless steel, always 1.5mm thick. A heavy-duty industrial grade construction, built for the highest level of durability and resistance to corrosion and dents

## T304Plus™

### T304PLUS™ ANTIBACTERIAL STAINLESS STEEL

To protect our sinks and keep them clean, we use proprietary T304Plus, an enhanced antibacterial stainless steel blend engineered to prevent discoloration and kill odor-causing bacteria, for a cleaner, longer lasting sink

### CERAMTEK™ NANOTECHNOLOGY

An innovative quartz composite with ceramic nanoparticles, CeramTek™ creates a rich visual experience with high definition colors. The advanced material provides a smooth hydro-repellent surface that causes water to bead up and roll off, for a kitchen sink that dries quickly and completely every time. CeramTek™ also offers improved resistance to impact, scratches, and thermal shock, ensuring the beauty and durability of your sink for a lifetime

### KORE™ WORKSTATION LEDGE

The unique integrated ledge featured in the Kore™ Workstation series offers maximum multitasking ability by supporting accessories that fit right over the sink for easy food prep and cleanup. The custom-fit accessories maximize available workspace in your kitchen by allowing you to slice, dice, and rinse right over the sink

## DrainAssure

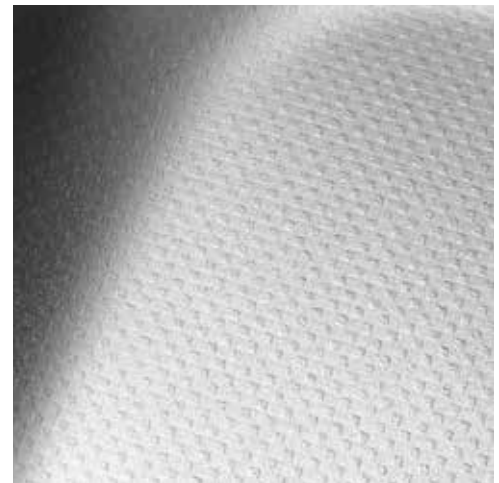

### DRAINASSURE™ WATERWAY

First to market with an integrated waterway channel: DrainAssure™ is a distinctive design element with advanced functionality, engineered to direct water into the drain even when the sink is full of dishes, ensuring that you'll never have standing water in the bottom of the bowl

### OUTLAST MICROSHIELD™ TECHNOLOGY

Outlast MicroShield™ sinks are constructed from a single sheet of steel imprinted with an embossed pattern that provides superior resistance to dents and damage, creating a sink that can stand up to heavy use without losing its sheen. High wear points reduce contact with heavy cookware, making it easy to maintain a like-new appearance for the life of the sink

### EZ STACK™ NESTED PACKAGING

To accommodate large projects for builders and professionals, our sinks can be modified to feature EZStack™ nested dimensions. With EZStack™, sinks fit together perfectly for efficient nested delivery and optimal job-site storage. Ideal for large projects and high volume orders, these sinks can be stacked up to 56 per pallet
