DATA 2 DECISION INTELLIGENCE

Spreadsheet/ EUC Forensics

A deterministic diagnostic service that reverse-engineers your critical Excel files.

What It Is :

A deterministic diagnostic service that reverse-engineers your critical Excel files and delivers a complete "digital autopsy" of your models.

1. Your Spreadsheets

- Actuarial Models
- Regulatory Capital Calculations
- Financial Forecasting
- Company Valuations

2. Forensic Analysis

- Deterministic Engine
- Every Formula Mapped
- Patterns deciphered
- Dependencies & Risks Identified

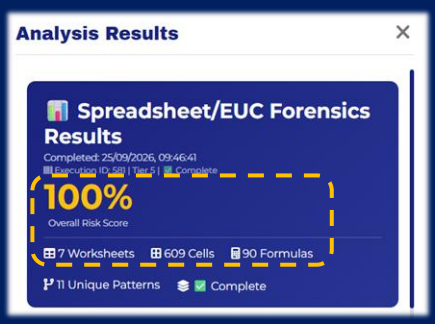

3. Digital Autopsy Report

- Plain English- Codebook
- Formula & Dependency Map
- Risk & Error Report
- Traceable Data Flow

THE RESULTS

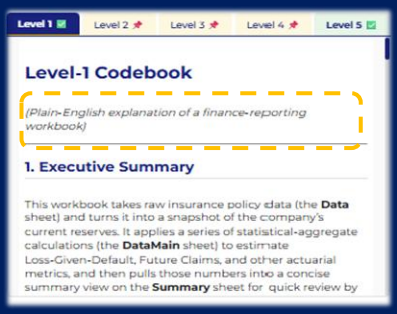

THE RISK REPORT

What is broken?

Identifies all broken links, hard-coded overrides, circular references, #N/A errors, and overly complex formulas.

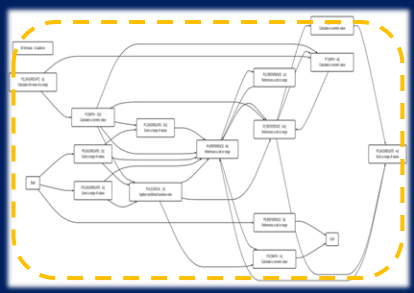

THE CODEBOOK

What does the logic actually do?

Documents the business logic of the model in plain English. No more "I don't know what this formula does."

THE DATA FLOW

How does the data flow through the model?

Traces every calculation, every cross-sheet link, and every dependency from primary input to final output.

From Black Box to Audit Ready Asset

- ***Diagnose :*** *Understand the Hidden Risks in your most Critical Models*
- ***Document :*** *Create a complete, auditable record of your model logic*
- ***De-Risk :*** *Ensure regulatory Compliance and Build a foundation of trust*

Who is it for?

- Finance Director
- Risk Manager
- Internal Auditor
- Technology Partner

Deterministic Engine — No Hallucinations, Auditable logs

Data Sovereignty — On-Premise Deployment. Your Data never leaves

Flexible Rental — Temporary Diagnostic Services. No Permanent License
