

TRUE SCENTER™

Make Everything Smell

Many states and counties do not allow the use of baits and lures. This is due to Chronic Waste Disease (CWD) that can spread from animals by sharing a common food and mineral source. The True Scenter changes this.

The True Scenter provides the same smells that attract the game to your location but does not allow for the animals to consume the contents. Thus, reducing the possibility of spreading CWD. The True Scenter makes everything a non-consumable scent. The preferred attractant scent can be available only when you are hunting by using the provided cap to maximize your chances to be there when the trophy comes in. No more cotton balls and reapplying expensive scent attractants.

Application Testing

We have tested doe urine, liquid minerals, apple juice and even corn. The less expensive mineral liquids seem to bring the deer in best. Per the Indiana DNR, this product can be used with anything, even corn, as the deer are not able to consume the contents. Check with your local county or state to verify that using scent attractants is allowed in your area.

EXPERIENCE SUCCESS WITH TRUE SCENTER

Use With:

- Traditional Doe Scents
- Liquid Mineral Baits
- Liquid Lure Attractants
- Fruits and Grains

Simply Hang

Simply hang the True Scenter where there is good airflow and at least 6 feet high above the ground. Hanging height and wind direction will affect results.

Cap When Not Hunting

The True Scenter is weather resistant and includes a tube cap to control scent when not hunting. The orange color makes it easy to find your hunting spot in the early morning darkness.
