SERVERS

- **Green Field Implementation.**
- **Server Maintenance Contracts**
- **Physical Servers & Data Migrations.**
- **We Supports all OEM's Hardware.**
- **Expertise in IBM Power Servers.**

We have vast experience in green field implementation for all type of RACK Servers, Blade Servers & HCI we are equipped to deliver Server implementation efficiently and quickly and following best practices. We have experience in creating well defined HLD (High level design) and LLD (Low level design) for green field implementations. We have also provided custom solutions for customer IT implementations. We provide Server maintenance, monitoring and comprehensive maintenance contracts for customers IT infrastructure. Our team has great experience in Server migrations including Physical and logical migrations.

We have delivered great deal of projects around Server implementation, Maintenance and Migrations.

SAN (Storage Area Network)

- ▪ **Green field Implementations of**
- ▪ **Block, Nas, Object & Ceph Storage.**
- ▪ **Green field implementations of**
- ▪ **SAN switches Implementations and Migrations.**
- ▪ **Physical & Data Migrations.**
- ▪ **Designing Solutions for SAN Infrastructure.**
- ▪ **Cross Platform migrations.**
- ▪ **Storage Virtualization & Replication.**
- ▪ **Tape Library Implementation & Migration.**

We have planned and executed huge migrations for large enterprise customers, and at the same time migrated data for smb customers as well. We are having great experience and expertise in green field implementations around all major OEMS. We have also executed many projects around storage replication and virtualization. We are expert in cross and similar platform migrations with seamless executions and minimum down time. We done installation and migrations some of very large Tape libraries in Delhi NCR region.

OS, VIRTUALIZATIONS & CONTAINERS

- **Green field Implementations, Migration, Upgrade & designing solutions around RHEL, SuSe, AIX Operating Systems .**
- **Virtualization around APV, KVM, Vsphere, Openshift etc.**
- **Designing and implementing containerized platforms using Docker, Podman, Kubernetes, Openshift etc.**
- **High Availability cluster using PowerHA, Pacemaker, DRBD**

We have expert consultants to execute projects around linux and services around it. We have executed many projects around various technologies on linux platform for various customers. We provide services around all Virtualization platforms whether it is green field

Implementation, Migrations or support. We have teams to provide 24 * 7 support on Virtualization, OS, Containers and SAN infrastructure. We are having expertize in containerize solutions and technologies around it.

Data Protection

- Designing and Implementing Backup Infrastructure for large, medium and small enterprises.
- Upgrade and migrate backup infrastructure.
- Specialize in planning and designing large backups.

Backup infrastructure is often ignored, and not paid fair attention. We have seen that in case of emergency, very often backup are not able to restore production environment from scratch. A common issue is that backups are not configured properly. As backups are very complex, though it seems very easy as backups vendors are making backup interface very easy to work. Administration of backup tools are getting easier while ignoring the fact that primary objective of tool is to provide restore. We have delivered very large scale enterprize backup Implementation projects, with successful backup and restore demonstration. We have executed successful projects on almost all the OEMS for complex hybrid environment.
