

Our effort

CONCEPT DESIGN → CAPABILITY DESIGN

Mission Need
• Identifying the purpose, objectives, and requirements for a specific undertaking

Capability Needs
• The specific abilities and competencies required to achieve a mission or goal

Operational requirements
• The specific conditions, capabilities, and resources needed to carry out a mission or task effectively

System requirements
• Specific conditions and capabilities that a system or software must meet to function effectively

Implementation
• the steps required to put a project, system, or initiative into action.

Common effort (Integration)
