

POLICY OF OCCUPATIONAL HEALTH AND SAFETY MANAGEMENT SYSTEM

WE STRIVE TO IMPROVE THE LIVING SPACE WITH CREATIVE LIGHTING SOLUTIONS AND INNOVATIVE HIGH- QUALITY PRODUCTS.

Our vision is to contribute to the quality of illumination and its positive influence to the mankind and its environment, preventively taking care of occupational health protection and safety. We strive to the zero risk level for all employees and third parties (construction workers and visitors) without injuries, occupational and occupation related illnesses.

In order to accomplish that, we need healthy workers and a healthy work environment, which Verentia achieves by appropriate planning, maintenance and constant improvement of the already established system of occupational health and safety management, in accordance with the requirements of the standard OHSAS 18001.

Our vision is being conducted in the following way:

- With leadership roles of the management;
- By providing the necessary resources, in accordance with the possibilities;
- By including and consulting all the interested parties in order to use their creative potential;
- With constant education and improvement of all employees;
- By monitoring and measuring the effects of occupational health and safety management system;
- By deciding based on the facts and data analysis;
- By checking and reviewing regularly the occupational health and safety management system.
