

INFORMATIONAL SECURITY POLICY

WITH BIG INVESTMENT IN KNOWLEDGE AND INNOVATIONS, WE STRIVE TO IMPROVE INFORMATION SECURITY, AS A WAY TO PROTECT THE EXECUTED INVESTMENTS.

Aware of fluctuation of employees as a normal lifecycle of companies and individuals, we manage the security of information and continuity of business, while protecting ourselves from accidental or intentional leakage of information, and we secure the following:

- Confidentiality, integrity and availability of all business information;
- Respecting and fulfilling of legal requirements regarding information safety and other external and internal requirements we are committed to;
- Protection of information from unauthorised access;
- Establishing methodology of risk estimation containing criteria for safety information risk assessment and providing guidelines for managing those risks;
- Frame for setting up the targets of information safety;
- Elaboration of plan of continuousness of business in extraordinary situations;
- Constant training and awareness raising of employees regarding the safety of information;
- Keeping track and researching of actual or potential breaches in information safety and
- Constant improvement of information security management.
