Design Engineering:
Just IT Solutions has engineers and training personnel available to assist with your network design needs. We are a registered BICSI member, ensuring your design needs will meet the highest industry standards. Our engineering services include but are not limited to systems analysis, systems selection, systems integration, inside and outside plant technology surveys, as well as specifications development.

Telecommunication Services:
- Inside Plant: Structured cabling systems including analog/digital voice systems, voice over IP, wireless systems, Gigabit network solutions, multimode and single-mode fiber solutions, FDDI and ATM fiber backbones, and video cabling systems.
- Outside Plant: Underground burial, aerial, fiber and copper splicing
- Other Services: Conduit and Panduit solutions

Networking Services
Every day the telecommunication industry rolls out new innovated products. Each one of those products has different requirements to operate at maximum efficiency. Our Network Engineers are available to analyze your current configuration and make recommendations in order to achieve peak performance.

Just IT Solutions, LLC

Telephony Services

Just IT Solutions strives to learn your day-to-day business so that we can apply and incorporate existing technology bundling services. Also by combining these services we are able to offer a single source solution with one network to manage. It lowers network costs, improves productivity, increases customer retention and creates a faster time to market.

Just IT Solutions can help you with planning, design, project management and implementation.

Design and Project Management Services:

Configuration and installation of PBX/KEY telephone, and VoIP for single and networked multi-site enterprises

- Converged Networks

Remediations and Clean Up

Network Rack Organization and clean up
Cable and Equipment removal recycling and destruction

Relocation Services

Relocating is more than packing and shipping equipment and services. It means finding a new facility and coordinating the move of your communications and networking services. In addition, it may require upgrades in equipment and technology.

Just IT Solutions will relocate actual phone lines, phone systems, file servers and networking equipment. Our relocation services provide a hassle-free move. We will plan and coordinate the move of your phone lines and control the move of your phone system and networking equipment to minimize downtime to ensure a seamless move. We can physically move your facility so that your employees can leave on Friday and be back operational on Monday with virtually no changes.
