Lunch
Gravy and Biscuit
Hashbrowns 29.
Bacon

Chicken Biscuit
Lunch
Pizza
Fries 30.
Corn

Art Contest Deadline Apr. 2

MOON MILK

The moon is more than 200,000 miles away from the Earth. At this distance it takes about three full days for astronauts to travel from the Earth's surface to land on the moon. Because it is Earth's closest neighbor, we have been able to gain more knowledge about it than any other body in the Solar System besides the Earth. The moon is also the brightest object in the night sky. Today, astronomers know that the moon is slowly moving away from the Earth. But at the rate it is traveling, about 1.5 inches per year, it will be lighting up our night sky for a long time.

DID YOU KNOW?

Milk is a popular dairy product and it is an excellent source of calcium and vitamin D. The delicious low-fat or fat-free milk you get at school comes from dairy cows.

Dairy products help build strong bones so you can grow up healthy. Three daily servings of dairy products are recommended for school age children. Some sources of dairy include milk, cheese, and yogurt.
