Roll

26.

Virtual Day

27.

Lunch
Taco
Round Chips
Cheese
Corn

28.

Lunch
Mini Pizzas
Curly Fries
Corn

29.

TEXAS STAR CITRUS

Stars are giant balls of superhot gas. Explosions in their centers create the bright light that we see. Did you know that our sun is a star? The star closest to earth is the sun. It takes about 8 minutes for light to travel from the sun to the Earth, so it is about 8 light minutes away. It takes 4.2 years for light from the next closest star, Proxima Centauri, to travel to Earth. It is 4.2 light years away. When you see the sun, you are seeing what it looked like 8 minutes ago and you see what Proxima Centauri looked like 4.2 years ago.

DID YOU KNOW?

Red grapefruit is the state fruit of Texas. In 1929 Texas citrus growers discovered a special grapefruit with a red color inside. Red grapefruit became the Official State Fruit of Texas in 1993.

Many people think the red grapefruits taste sweeter. Grapefruits got their name from growing in bunches like grapes. The Texas red grapefruit is high in vitamins A and C, which means eating a Texas red grapefruit or drinking its juice, is good for the eyes and skin, and strengthens the body's immune system.
