

WHAT IS myON Reader™?

myON Reader is a learner-centered online literacy solution that provides unlimited access to thousands of enhanced and engaging digital books on a wide variety of topics. With myON Reader, children can read independently or together with family members, anytime and anywhere.

The following key features make reading enjoyable, while helping young children gain the early literacy skills they need to become proficient readers by third grade, and supporting all children to become lifelong readers and learners.

- An intuitive, age-appropriate dashboard provides access to the myON library and enables all readers to choose and read books that match their interests and reading levels.
- Flexible reading supports—audio, highlighting, an embedded dictionary and a zoom feature—encourage new and struggling readers.
- Always on, 24/7, on weekdays, weekends, holidays and over the summer—so youngsters and families can access myON Reader whenever they want or need to read.
- There's no limit to the number of times a book can be read and no waiting for books to become available—so children and families can always access the books they want to read.
- Online reading is supported on any web-enabled device—desktops, notebooks and tablets—wherever readers may be, including at home, in school, at the library and in community centers.
- Readers can download up to 20 books at a time for offline reading— with free mobile apps for iPad, Android devices, Chromebooks and Kindle Fire HD.
