THE HARROD SOUTHWOLD COLLECTION

The **English Garden Company Pty Ltd**, located in the Southern Highlands of NSW Australia is proud to be the exclusive Australian distributor for the world renowned 'Harrod Horticultural' products from the United Kingdom.

Harrod Horticultural, regular exhibitors at the Chelsea Garden Show and showcased in some of the finest English estates, supply a range of the highest quality garden structures, garden enclosures and beautiful, hand crafted garden furniture.

We are excited to present the exclusive '**Harrod Southwold Collection**'! Created in Harrod's workshops in Suffolk, England, this magnificent, collection is the epitome of English craftsmanship, built to last a lifetime, these heirloom pieces are an investment that will stand the test of time in the harshest of Australian conditions.

ENDURING COMFORT

Much thought has gone into the ergonomics of the seat design and careful selection of the material sections used to ensure just the right amount of 'give' is coupled with the required structural strength. The chair designs are tapered front to back and the back rest has a curved form which combined, improves aesthetics and comfort. The legs use 8mm thick strip steel for strength and rigidity whereas the seat base uses 3mm thick strip to give comfort and spring. Cushions can be ordered with your furniture for ultimate comfort but we are confident from customer feedback that even without padding our chairs are kind to the behind.

HANDCRAFTED PRODUCTION

All of our furniture is handcrafted by skilled technicians and finished in the Harrod Horticultural workshops in Suffolk where they have been manufacturing for 70 years. Due to the handmade nature of the products all pieces are unique. Parts are cut, rolled, hand assembled and then precision welded to form the whole – no customer assembly required. Before final finishing, all of the products are hot dipped in a bath of molten zinc which envelops the steel in a blanket of sacrificial rust protection. Each piece of furniture is therefore extremely tough and durable, and with a substantial weight, so will withstand the most extreme Australian weather.

HAND ETCHED FINISH

Each piece of furniture is chemically etched by hand after the zinc coating is applied leaving an antique finish. The joy of these hand processes means that every piece has its own character that evolves with age and improves as the product weathers. Colours can vary from light to dark grey. The finish is always varied, it is not a paint and is not intended to be completely uniform, which adds to the charm of these unique pieces.

MINIMAL CARE

Steel is the perfect material for all-weather furniture. When steel is hot dip galvanised it gives robust rust protection and one of the many advantages of the Southwold collection is that the nature of the patination ensures the surface will improve as it weathers. There is no need to cover it over winter, instead this beautiful stylish furniture can be enjoyed all year round!

25 YEAR GUARANTEE

All furniture pieces in the collection are covered by a **25 YEAR STRUCTURAL GUARANTEE**. Our testing suggests that due to the level of quality of manufacture and materials, coupled with the timeless style, the collection can truly be considered as heirloom pieces that will last for generations with our care instructions.

STRUCTURAL
25
YEAR
GUARANTEE

With innovation and engineering excellence at the forefront, plus 70 years of UK manufacturing, each piece in our range features high grade materials and world class finishing, the kind of quality for which Harrod Horticultural is known!

A handwritten signature in green ink that reads 'Stephanie Harrod'.

Stephanie Harrod

Every product is the result of 70 years excellence in British engineering using established and advanced new techniques to deliver the highest expectations of quality and performance.

DESIGN INNOVATION

Our Innovation Centre facilities include a research and development workshop and design offices. Along with a dedicated design team it supports our ability to innovate, lead and inspire with our product ranges as well as provide customers with an impressive bespoke product design service too.

QUALITY MATERIALS

Every Harrod Horticultural product is made using carefully selected long lasting materials, whether it is the framework itself or the fixings, and is why many of our products carry a lengthy guarantee. Check off the fine specification details of our products against others, you will find ours to be of peerless quality.

MARKET LEADING FINISHES

This includes our in house powder coating plant that produces the very best weatherproof finish. Our Southwold Collection meanwhile is hand etched for a timeless antique patina.
