

# Preserving for the Future

**Rails  
with  
Trails  
Supporting  
Train  
Cyclists**

**Maine DOT can build rails AND trails**

**They have already done it in Fryeburg, Hallowell and Lisbon!**

When other states have built rails with trails, the result allows for ...

**TRAIN CYCLISTS:** people who take their bikes to a train station, carry their bikes on the train, exit with their bikes to pedal to work or play.

**Once the rails are removed, so are future options  
Together let's consider *all* options to preserve Maine!**

**Steel wheels on steel track –  
the most efficient and the most environmentally friendly transit**
