## FORECAST

## Another Increase Predicted for County New Vehicle Market in '15

This year's increase follows the 6.8\% improvement in 2014; market is up 84\% between '09 and '14!

Forecasting automotive sales is a delicate balancing act. There are frequently conflicting indicators that can provide mixed signals on future market conditions. The trick is identifying these trends, separating the meaningful from the meaningless, and forming a consensus on where the market is headed. Below, we identify the key positive and negative forces that are likely to impact the market in 2015.

## Forces leading the market higher

- Low interest rates and mild inflation growth have kept new vehicle affordability at historically strong levels. Many economists are expecting a slight increase in interest rates in 2015, but wages are likely to move higher and gas prices have fallen, which should give a boost to disposable incomes.

Payrolls grew steadily during 2014, and the majority of labor market economists are expecting this trend to continue in 2015. Employment levels have been posting impressive increases, while the unemployment
rate is down considerably from the highs in 2009. Increasing employment is an obvious plus for new vehicle sales.

Pent up demand and benefits to "upgrade" should continue to give the market a boost. The average age of vehicles on the road exceeds 10 years, which based on historical standards, is very high. Some have argued that due to improvements in quality and durability, this is to be expected, and the time-line needed to replace vehicles is stretching out. But this only tells part of the story. Greatly improved safety, fuel economy, performance, and technology in today's cars and trucks provides a powerful motivation for consumers to enter the new vehicle market. The average ten year-old, 2005 model year vehicle can't even come close to a new, 2015 model. From a car owner's standpoint, the motivation to upgrade is powerful.

## Forces holding the market back

- While U.S. economic growth was solid for most of 2014, the global economy has slowed considerably. Japan is in a recession, Chinese growth has slowed, and Europe appears to be on the verge of a recession, with deflation. Continued weakness in the global economy could eventually impact the U.S. in the form of slower employment growth, and stagnant incomes.

Household balance sheets. Consumers have made considerable headway in reducing debt, but are largely hesitant to fund increases in spending by adding on more debt. In addition, many have insufficient savings for retirement, necessitating further restraint in retail spending.

Wrap up: Positive factors will likely lead the market higher in 2015, but we believe that the negative factors will place a ceiling on how high new vehicle sales will go, and we could approach that ceiling by 2016.

Annual Trend in Orange County New Vehicle Market

The graph above shows annual new retail light vehicle registrations in the county from 2008 thru 2014 and Auto Outlook's projection for 2015.

|  | 2012 | 2013 | 2014 | $\begin{array}{r} \text { \% ch. } \\ \text { '13 to '14 } \end{array}$ |

## MARKET TRACKER: MONTHLY MOVING AVERAGE

## New Vehicle Market Continues to Post Gains

Percent change in three month moving average has improved for $\mathbf{3 7}$ consecutive months!

The graph to the right provides a clear picture of the general trending direction of the Orange County new retail light vehicle market. And as highlighted in the graph, the trend over the past two years is decidedly positive. The graph shows the year-over-year percent change in the three month moving average of new retail light vehicle registrations. The three month moving average provides a clearer picture of the trending direction than individual monthly registrations, which can fluctuate due to such factors as the timing of manufacturer incentive programs, weather, and vehicle title processing delays by governmental agencies.

New vehicle registrations have continued their upward trend during the past several years, with the three month moving average increasing from year earlier levels in 59 of the past 61 months!

## BRAND SCOREBOARD - PART ONE

## Toyota Registrations Increased by 2,670 Units in 2014

## FIAT and Ram had the largest percentage increases last year

The graph below presents a comprehensive picture of brands that are gaining (or losing) ground in the county market. It shows both the unit AND percent change in registrations from 2013 to 2014. Viewing both measures on the same graph provides a more clear-cut signal on how each brand is doing.

Here are a couple of examples: Lincoln had a sizeable percentage increase last year (up $14.6 \%$; shown by the thick blue bar on the graph), but it's a relatively low-selling brand. Lincoln registrations increased by only 51 units. Toyota's percentage increase was in the middle of the pack (up $8.9 \%$ ), but unit regis-
trations were up by a sizeable 2,670. Subaru posted big gains last year. Registrations increased by 917 units versus a year earlier, up 32.8\%. Ram and FIAT also had significant percentage and unit increases.

## Change in New Retail Light Vehicle Registrations (2014 vs. 2013)

## BRAND SCOREBOARD - PART TWO

## Toyota is Most Popular Brand in County

## Mercedes, Honda, BMW, Lexus, Hyundai, and Mazda also rank high

The graph below provides an indicator of brands that are popular in Orange County (relative to the National standard), and those that are not.

Here's how it works: For the top 30 selling brands in the county, each brand's share of the U.S. market is multiplied by retail registrations
in the county during 2014. This yields a "target" for the country market. Target registrations are subtracted from actual registrations to derive the measurement of sales performance.

Brands at the top of the graph (i.e., Toyota, Mercedes, Honda, BMW, Lexus, Hyundai, and Mazda are relatively strong sellers in the
county, with actual registrations exceeding calculated targets by large margins. For instance, Toyota registrations exceeded the target by 8,858 units.

Data Source: AutoCount data from Experian Automotive

Orange County Retail Market Performance based on registrations for 2014 Actual registrations minus target (county industry registrations times U.S. market share)

## LONG TERM TRENDS

## Further Improvement Predicted for Market in 2015

## Market predicted to increase for sixth consecutive year

The two graphs below provide a long term perspective of trends in the Orange County new retail light vehicle market. The first graph shows historical registrations from 2007 thru 2014, along with Auto Outlook's forecast for 2015. The second graph shows light truck share of the overall light vehicle market. Source: AutoCount data from Experian Automotive.

County New Retail Light Truck Market Share - 2007 thru 2014

## [Jey Wende

Between 2009 (the low point during the market downturn) and 2014, county new retail light vehicle registrations have increased by more than 80,000 units an increase of 84\%!

The market was up $6.8 \%$ last year versus 2013, and Auto Outlook is predicting a $4.1 \%$ increase this year.

Following a wild roller-coaster ride during the seven year period, county registrations exceeded 2007 levels in 2014, and should easily do so again this year.

## [Koy ternds

Light truck share of the Orange County light vehicle market declined by eight market share points between 2007 and 2012.

Light truck share was up in 2013 and 2014.

## Orange County Market Increased 6.8\% in 2014

## U.S. market was up 5.9\%

## Explanation of Data

Data presented in Auto Outlook measures new vehicle registrations in Orange County. Monthly recording of registrations occurs when vehicle title information is processed.

Orange County Auto Outlook is distributed free of charge to members of the Orange County Automobile Dealers Association. The publication is sponsored and supported by the Association. Orange County Auto Outlook is published and edited by Auto Outlook, Inc., an independent automotive market analysis firm. Opinions expressed are solely those of Auto Outlook, Inc., and are not necessarily shared by the Association.
