# Orange County Auto Outlook" 

## FORECAST

## County Market Predicted to Increase 7.6\% in 2013

New retail light vehicle registrations predicted to exceed 160,000 units this year

2012 is now in the books and it was a very good year for the county new retail light vehicle market. As pointed out on the right, new registrations moved higher last year, for the third consecutive year. The big question now is what's in store for the market during 2013. Short answer: slower growth. New vehicle sales are likely to increase again this year, but the percentage gain is almost certain to fall short of the gain in 2012. There are three primary reasons for this:

- The labor market is still struggling. The county unemployment rate has come down during the past two years, but is still high ( $9.1 \%$ in November of 2012). Too many county residents are searching for work for new vehicle sales to move sharply higher.
- Household balance sheets are still on the mend. We have been tracking consumer debt levels for almost 10 years now, and although consumers have made headway, the de-leveraging process has not run its course.
- Fiscal policy will restrict growth. In order to get public debt under control, the Federal Government will likely be rasing taxes, and cutting spending, both deterrents for economic expansion and household income growth.

The good news is that there are currently more positive market determinants than the negative ones mentioned above. The two primary factors that will almost certainly lead to an increase in sales this year

Annual Trend in Orange County New Vehicle Market

The graph above shows annual new retail light vehicle registrations in the county from 2008 thru 2012 and Auto Outlook's projection for 2013.
are pent up demand and vehicle affordability. We have been tracking pent up demand for several years now, but it is still the single most significant force driving the market. Consumers delayed purchasing new vehicles during the recession, and as a result, vehicles are old and wearing out. In addition, new vehicles offer a tremendous improvement when compared to the average 11 year old vehicle currently on the road. This pent up demand is leading many consumers into county showrooms, while strong affordability (aided by record-low interest rates) and improved availability of credit are the final ingredients leading many to purchase a new vehicle.

## Threc They Market ternds

亿 Orange County new retail light vehicle registrations increased $23.9 \%$ from 2011 to 2012, well above the estimated $13 \%$ improvement in the Nation.
C. Auto Outlook projects that the county new vehicle market will improve $7.6 \%$ from 2012 to this year. The uptick next year would mark the fourth consecutive annual increase.
3. Higher fuel prices during most of last year and many key new vehicle introductions gave a boost to car sales in the county. New retail car registrations were up $29 \%$ in 2012, and market share was up by 2.5 points.

Market Summary

|  | 2010 <br> Annual | 2011 <br> Annual | 2012 <br> Annual |  |
| :--- | ---: | ---: | ---: | ---: |
| TOTAL | 106,329 | 120,800 | 149,630 | \% ch. <br> '11 to '12 |

## MARKET TRACKER: MONTHLY MOVING AVERAGE

## Market Continues to Post Big Gains

Percent change in three month moving average exceeded $25 \%$ in each of past seven months

The graph to the right provides a clear picture of the general trending direction of the Orange County new retail light vehicle market. And as highlighted in the graph, the trend over the past two years is positive. The graph shows the year-over-year percent change in the three month moving average of new retail light vehicle registrations. The three month moving average provides a clearer picture of the trending direction than individual monthly registrations, which can fluctuate due to such factors as the timing of manufacturer incentive programs, weather, and vehicle title processing delays by governmental agencies.

The market has continued its steady climb back to respectable sales levels. The three month moving average increased by more than $25 \%$ during the past seven months.

Change in market share

## BRAND SCOREBOARD - PART ONE

## Kia Posts Largest Gain in 2012

## Kia's annual increase was 48.2\%; Subaru posts big gain in Fourth Quarter

The graph below provides a quick snapshot of brand sales performance in the county market. For the top 20 selling brands, it shows the percent change in new retail light vehicle registrations from 2011 to 2012, and the change from the Fourth Quarter of 2012 vs. a year earlier. Brands are shown from top to bottom based on the year-to-date percent change.
Data Source: AutoCount data from Experian Automotive.
Percent Change in County New Retail Light Vehicle Registrations (Top 20 Selling Brands) 2012 vs. 2011, and Fourth Quarter 2012 vs. Fourth Quarter 2011

## BRAND SCOREBOARD - PART TWO

## Toyota and Mercedes Rank High in County Market

## BMW, Lexus, Honda, and Hyundai are also strong sellers

The graph below provides an indicator of brands that are popular in Orange County (relative to the National standard), and those that are not.

Here's how it works: For the top 30 selling brands in the county, each brand's share of the U.S. market is multiplied by retail registrations
in the county during 2012. This yields a "target" for the county market. Target registrations are subtracted from actual registrations to derive the measurement of sales performance.

Brands at the top of the graph (i.e., Toyota, Mercedes, BMW, Lexus, Honda, and Hyundai) are relatively strong sellers in the county, with
actual registrations exceeding the calculated target by a large margin. For instance, Toyota registrations exceeded the target by 8,196 units.

Data Source: AutoCount data from Experian Automotive.

Orange County Retail Market Performance based on registrations for 2012 Actual registrations minus target (county industry registrations times U.S. market share)

## Toyota Prius is Best Seller in Sub Compact Car Segment

## Honda CRV is best-selling Compact SUV

The table below shows the top five selling models during 2012 in 16 primary market segments. In addition to unit registrations, it also shows each model's market share in its respective segment.

Toyota Camry retained the top spot as the best-selling Standard Mid Size Car, with a
23.5\% share. Toyota Prius was first among Sub Compact Cars, followed by Honda Civic and Toyota Corolla. (Note Prius figures include the $\mathrm{c}, \mathrm{v}$, and Plug in). Mercedes E-Class was the best seller among Luxury Cars.

Toyota Sienna and Honda CRV were the best selling Mini Van and Compact SUV, respec-
tively. Ford Explorer was first among Full Size SUVs (including Crossovers). Lexus RX was the best-selling Luxury SUV.
