

Natural Stone Thin Veneer

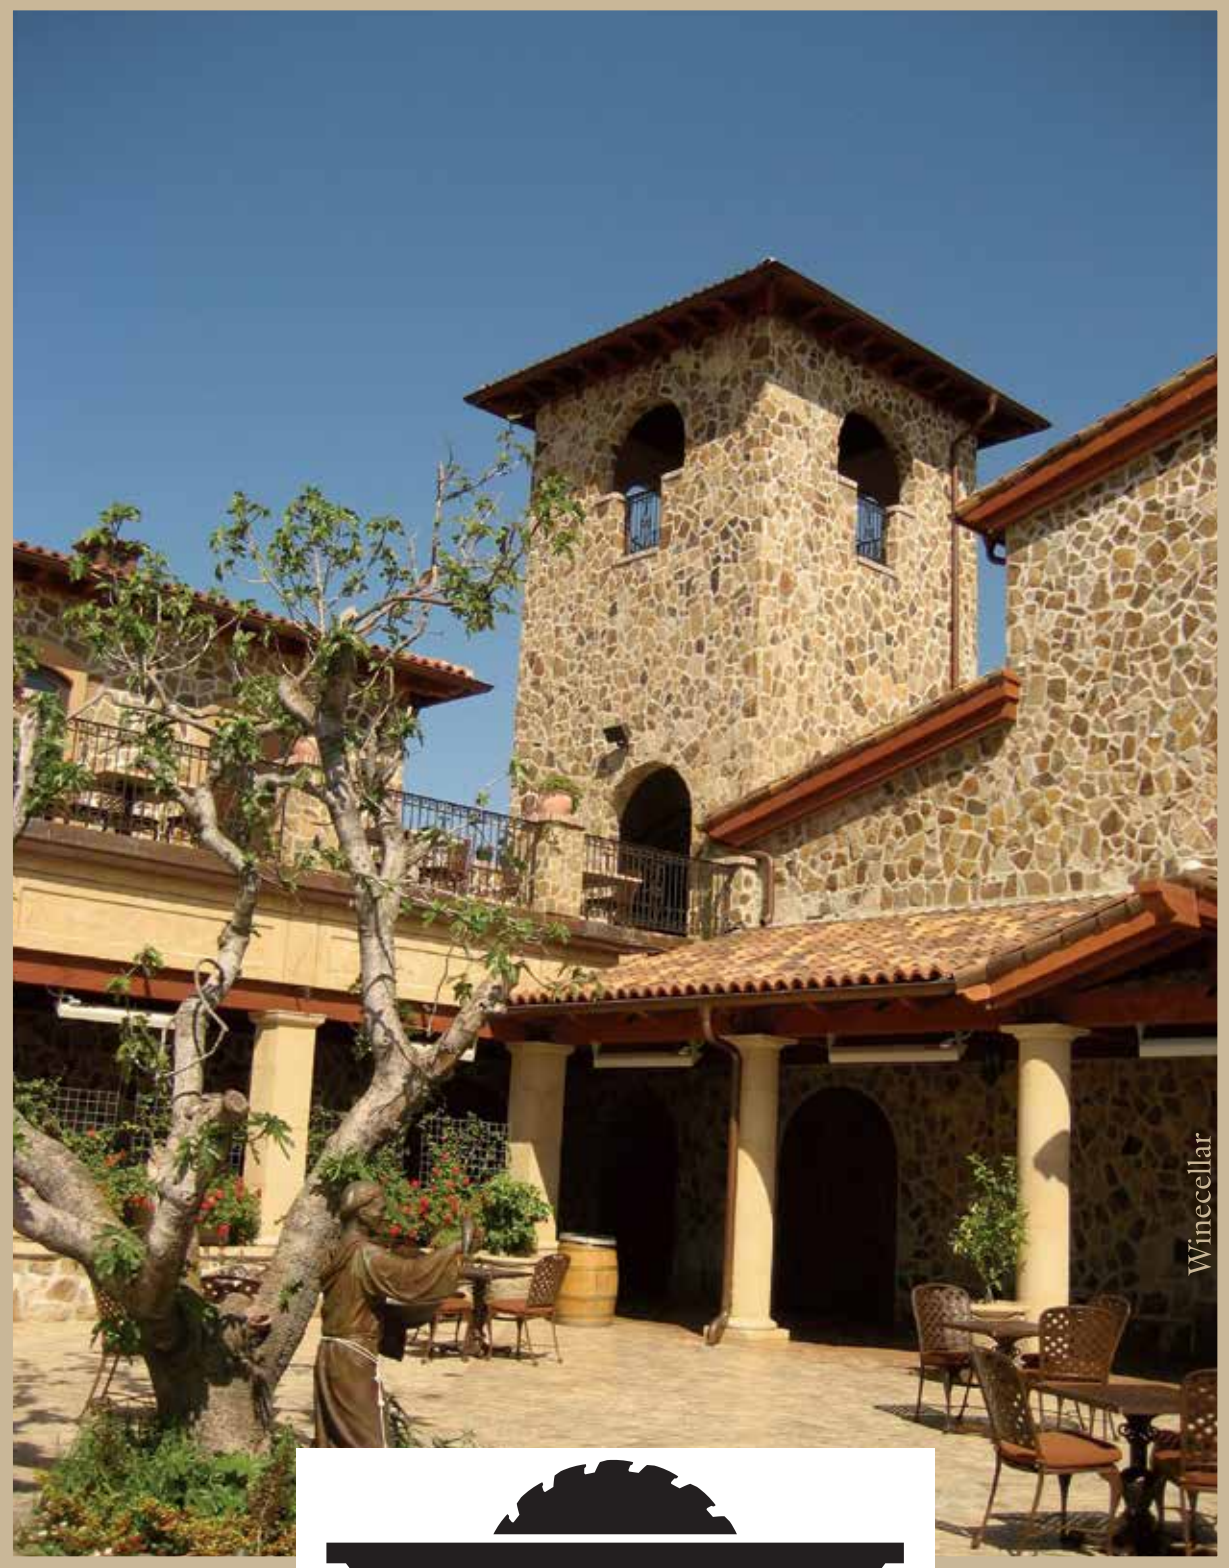

Natural Stone Thin Veneer is created by a process in which real stone is cut to a thickness of 3/4 to 1 1/4 inches. Corner pieces provide the look of a full size stone with all the benefits of a thin stone including easy installation and versatility.

**Quarry Services, A Custom Stone Company for Your Custom Home.**  
In addition to natural stone thin veneer, Freedom Stone Company offers all stone blends in a standard 3-5 inch thickness. All products can be tumbled to achieve an “old world” appearance. Customized blends and patterns ensure the uniqueness of your next home or project.

Who are we? Quarry Services is a natural stone thin veneer saw shop. We have a team of dedicated sawing professionals in two locations with over 50 years of collective sawing experience and an executive team

with over 100 years combined experience in the masonry veneer industry. We collect and saw stone from all over the Western U.S. We are constantly working with our vendors to provide you the best natural material available. Each stone we cut is quality controlled and then hand-washed. All of our stone is under the 15 lbs/square foot required for masonry veneer products.

**Accurately quoted shipments can be the difference between making money and losing money.**

Price is one component of value, but time is money and there are many ways "cost-effective" stone can end up costing you more. Contractors and masons work hard to stay on

schedule and accurately quoted shipments can be the difference between making money and losing money. Of course, it's never fun to end up short on a job because of bad or broken material. Even pallet quality can affect

your stone's ability to arrive on time and in one piece. We take a holistic approach to our business, engaging all facets of the customer experience – price, service, dependability and ingenuity.

**We work with you to put together a stone line to fit your needs and specifications.**

Interested in your own natural stone thin veneer line? Ask us about our private label capabilities. We work with you to put together a stone line to fit your needs and specifications. Beyond that, we can provide marketing materials, displays and custom-labeled pallets. We cut private label stone for some of the biggest names in the building supply industry.
