

TAMPER EVIDENT SECURITY

TAPE MATERIAL

23 micron Polyester fim (PET) / metalised polyester delivers the ideal balance between bag making efficiency and tamper evidence.

ADHESIVE

Designed for security applications with extremely high initial track, 50/55 GSM , rubber based hot melt adhesive. Will not dry out, will not dissolve in water and its solvent resistant.

LINER

23 micron polyester (PET) / metalised polyester

Most commonly used film liner, offers easy removal and most economical can be perforated to create folded tab for easy removal, tinted or printed with copy, will not seal to LDPE bag.

36 micron Polyester (PET) / metalised polyester

Easy to remove , can be tinted or printed with copy, will not seal to LDPE bag.

58 MICRON WHITE BOPP

Opaque , solid core white BOPP, will not seal to LDPE bag, exposed side is not treated.

SECURITY FACE CUT

Strategically positioned face cut designs are encouraged to increase security. Tape is destroyed when removed.

PRODUCT PACKAGING

Tape can be wound up to 2,000 meter per flat roll or 8000 meter traverse wound spools.

TAPE DESIGN

A custom design is always developed to differentiate your product in the marketplace.
