

BTC WHITE PAPER 2026

## Everyone Wants an AI Rocket. We Build the Launch Pad.

Most organizations chase AI features. The ones that win build **AI Systems** — governed portfolios of capability that compound over time. BTC's structured **6-month framework** transitions organizations from fragmented AI experiments to a disciplined, value-generating portfolio. Not tools. A system.

CORE THESIS

The constraint is never the model. It is always the maturity of the organization beneath it.

### 01 THE PROBLEM

AI adoption in most enterprises is fragmented — isolated pilots and siloed deployments with no shared accountability. Use cases deliver local wins but no organizational lift. The stack collapses because the foundations were never built.

### 02 THE DIAGNOSIS

BTC's **AI Maturity Matrix** scores seven domains across five levels. The **Maturity Constraint Line** reveals which domain throttles the entire portfolio. You cannot outrun your lowest floor.

### 03 THE PRESCRIPTION

A 6-month engagement lifts all seven domains in coordinated sequence. The **Execution Heatmap** drives accountability. The **AI Portfolio Framework** governs use cases, resourcing, and value measurement.

BTC PROPRIETARY FRAMEWORK

## THE AI MATURITY MATRIX

7 domains, 5 levels each. 1 constraint line that tells you exactly where to focus first

Maturity Constraint Line: drawn at the lowest scoring domain

BTC PROPRIETARY FRAMEWORK

## FROM FRAGMENTED TO GOVERNED
