About the Designer

Adrienne L. Watson

Gardening has been part of my life since the age of seven, when I first discovered the joy of nurturing living things and shaping outdoor spaces with my Mom. Today, as a certified Texas gardener and nursery professional, I bring decades of hands-on experience to every project. My background as a professional artist deeply influences my approach—each garden is treated as a living canvas, where color, texture, form, and movement come together with intention. I design with an eye for beauty, a respect for nature, and a commitment to creating spaces that feel both personal and inspiring.

Garden Installation Packages

Every garden I create is designed to be both beautiful and meaningful. It is a space where nature, creativity, and purpose come together. With over 45 years as an artist, I approach each garden as a living work of art, thoughtfully designed to bring peace, color, and life to your outdoor space.

CUSTOM GARDEN DESIGN

Every garden is thoughtfully designed to fit your space, lifestyle, and vision. Each installation is planned to create beauty and balance.

PROFESSIONAL INSTALLATION

Your garden is fully installed for you from soil prep and raised beds to planting and finishing the details; so you can enjoy it without the stress.

ARTISTIC & MEANINGFUL

With over 45 years as an artist, each garden is created as a living work of art. Optional custom garden art makes each space unique.

Whether you want to refresh the front of your home, grow fresh herbs, or create a peaceful biblical-inspired garden, each installation is customized to fit your space and vision. My garden packages provide a clear starting point while still allowing room for personal touches, decorative elements, and artistic features that make your garden unique.

These are the three core garden installation options, along with optional upgrades that can further enhance the beauty and function of your garden.

In-Ground Garden

A community garden installation transforms a portion of your school's grounds into a productive, well-designed growing space that serves both your students and the surrounding neighborhood. This garden includes an in-ground planting design, and optional greenhouse integration, creating a welcoming place for fresh produce, learning, and community connection.

Investment Range: \$3,500-6,500+

Quarterly Refresh Option: \$300-\$500 per visit

Includes: On-site consultation and/or spiritual design intention, curated plant palette for North Texas climates, soil enrichment and in-ground bed preparation, and flourishing strategy, and a printed care guide. A 50% design and installation retainer secures your project date.

Raised-Bed Garden

A raised-bed community garden provides a clean, organized, and accessible growing space built with high-quality materials and filled with nutrient-rich soil. Designed for productivity and ease of maintenance, these elevated beds create a welcoming environment for children and parents to grow fresh produce, learn new skills, and build community through shared gardening.

Investment Range: \$6,500 – \$12,000+

Quarterly Refresh Option: \$300–\$500 per visit

Includes: On-site consultation and curated plant palette for North Texas climates, soil enrichment and self-watering bed preparation, plants, and flourishing strategy, and a printed care guide. A 50% design and installation retainer secures your project date.

Biblical Garden Sanctuary

Throughout Scripture, gardens are places of encounter: Eden, Gethsemane, resurrection morning.

A Biblical Garden Installation integrates symbolic plants and thoughtfully chosen Scriptures to create a space of meditation and spiritual anchoring.

This is a living expression of Scripture for your school
Investment: Starts at \$7,500+

Includes: Concept consultation, Scripture - 7 integrated herb selection, 20 symbolic flowers, customized Scripture, Bench optional dedication ceremony (with speaking engagement for churches and ministries). A 50% design and installation retainer secures your project date. Additional add-ons available.

 - Pollinator friendly plants
 - 1- hand-painted Scripture of choice
 - Printed care guide

Custom Add-On's

Garden structures add both function and visual interest to your outdoor space. These elements help define the layout of your garden while supporting plant growth and creating inviting areas for relaxing and enjoying nature. From raised beds and planter boxes to trellises, these additions help organize the garden.

Decorative accents bring personality and charm to a garden space. These elements help transform a simple planting area into a welcoming and peaceful outdoor environment. Items such as decorative pots, wind chimes, garden lighting, seating, and outdoor rugs create warmth, comfort, and visual beauty.

Landscape features help shape the structure and flow of the garden while improving accessibility and usability. Pathways, gravel areas, borders, and additional planting spaces create a balanced design that connects different parts of the garden together. These features add texture, organization, and durability while enhancing the natural beauty.

Custom Add-On's

Or Alacart

Garden Structures
