

## **Decode for Backstage The Space Programs & More**

Primarily there are 6 basic Human Space Programs;

1. The Dark Fleet (Nazi- see backstage decode on this).
2. Solar Warden (flipped to white hats with a start of that in 1987 getting the mind wipe/blank slate technology and then fully WH in 1992).
3. The UN program for all nations (very low level).
4. The MIC (military industrial complex), this was the most advanced until the war for our solar system started and humanity stood up to the false darkness.
5. The Corporate Conglomerate (also very high tech).
6. The US Air Force (low tech).

Craft using an inertial mass reduction device

## Abstract

A craft using an inertial mass reduction device comprises of an inner resonant cavity wall, an outer resonant cavity, and microwave emitters. The electrically charged outer resonant cavity wall and the electrically insulated inner resonant cavity wall form a resonant cavity. The microwave emitters create high frequency electromagnetic waves throughout the resonant cavity causing the resonant cavity to vibrate in an accelerated mode and create a local polarized vacuum outside the outer resonant cavity wall.

The quantum vacuum plasma (QVP) is the electric glue of our plasma universe. The Casimir Effect, the Lamb Shift, and Spontaneous Emission, are specific confirmations of the existence of QVP.

It is important to note that in region(s) where the electromagnetic fields are strongest, the more potent the interactions with the QVP, therefore, the higher the induced energy density of the QVP particles which spring into existence (the Dirac Sea of electrons and positrons). These QVP particles may augment the obtained energy levels of the HEEMFG system, in that energy flux amplification may be induced.

It is possible to reduce the inertial mass and hence the gravitational mass, of a system/object in motion, by an abrupt

perturbation of the non-linear background of local spacetime (the local vacuum energy state), equivalent to an accelerated excursion far from thermodynamic equilibrium (analogous with symmetry-breaking induced by abrupt changes of state/phase transitions). The physical mechanism which drives this diminution in inertial mass is based on the negative pressure (hence repulsive gravity) exhibited by the polarized local vacuum energy state (local vacuum polarization being achieved by a coupling of accelerated high frequency vibration with accelerated high frequency axial rotation of an electrically charged system/object) in the close proximity of the system/object in question. In other words, inertial mass reduction can be achieved via manipulation of quantum field fluctuations in the local vacuum energy state, in the immediate proximity of the object/system. Therefore it is possible

to reduce a craft's inertia, that is, its resistance to motion/acceleration by polarizing the vacuum in the close proximity of the moving craft.

Polarization of the local vacuum is analogous to manipulation/modification of the local space time topological lattice energy density. As a result, extreme speeds can be achieved.

Additionally and primarily solar warden is made of submarine looking craft;

# Solar-Windens Energie Flott USSS HILLENKOETTER

Das USSS HILLENKOETTER ist ein Solar-Windens Energie Flott, das für die Erzeugung von Strom aus erneuerbaren Energien entwickelt wurde. Es ist ein innovatives Schiff, das die Vorteile von Solar- und Windenergie kombiniert. Das Schiff ist mit Solarzellen und Windturbinen ausgestattet, die die Energie für die Erzeugung von Strom liefern. Das Schiff ist auch mit einer Batterie ausgestattet, die die Energie speichert, wenn die Sonne nicht scheint oder der Wind nicht weht. Das Schiff ist ein umweltfreundliches und nachhaltiges Schiff, das die Zukunft der Schifffahrt darstellt.

Species and beings;

## REPTOIDS

Reptoids range from five and a half to 9 feet in height. They have lean, firm bodies with powerful arms and legs. They have long arms with three long fingers and an opposable thumb. Their feet have three toes and one recessed fourth that is toward the back side of their ankle. The claws are short and blunt. They do not have teats on their upper torso nor do they have a navel.

They have scaled skin that is usually greenish-brown in color. Some also have coffee colored scales that have dark green colored rims. The scales (or scutes) on their backs, thighs and upper arms are usually large. Their hands, abdomen and face are covered with smaller scales, allowing more flexibility. They have wide lipless mouths and the majority of them are reported to have differentiated types of dentition (teeth,) including canines (fangs.)

Reptoids have either large black eyes with vertical slit pupils or eyes that are white with flame colored vertical slit pupils. Their

heads are slightly conical in shape and have two bony ridges riding from their brow, across their back sloping skull, toward the back of their head. (Throughout history, these bony ridges may have been misidentified as protruding horns.)

There appears to be no bridge between the Reptoids eyes. Their nasal openings are at the end of a small, flattened nose and are described as two small slits that slant upwards in a V formation.

Some experiencers have reported seeing small openings where ears are expected to be, but no flesh folds extending from the side of the head as human have.

Reptilian beings have no body or facial hair. Occasionally, eyewitnesses observed reptilian beings with thin, fleshy spines under their chins. From a distance, the spines are often misidentified as hair. (Even

today, one can find lizards with these same fleshy spines under their chins. They are called Bearded Lizards.)

Reptoids having tails and non-tailed reptoids have been reported over the years. The tails vary in size and are often observed as being held off the ground. Their posteriors are either like that of a human, with a vertical slit shielding an excretory orifice, or are comprised of a rounded muscular area, extending from the base of the spine to the upper thigh region.

Their genitalia are concealed within a vertical slit located at the base of the torso (cloaca.) In the case of women who claim to have experienced sexual encounters with reptoids (an experience that seems more psychological than physical in origin,) the male reptoids are described as having a penis that is lacking a soft saced scrotum.

Where the scrotum sack is located on a human, the reptilian male, apparently has a firm, muscular bulge leading from the base of the penis to the underside of the torso.

DRACO

The Draco reptoids, usually standing seven to twelve feet tall, have been reported to be the royal elitists of the reptoid hierarchy. They are seen far less often than other reptoids types. The Draco are similar in appearance to the Reptoid, but they have distinct physical differences.

Draco have wings. These wings are made of long, thin bony spines or ribs that protrude out of their backs. The ribs are adjoined by flaps of leathery, blackish-brown skin.

In several contacts, people have seen reptilian looking beings wearing capes

draped over their shoulders and down their backs. The capes may either be a piece of clothing specifically designed for covering the Dracos wings or their retracted, dark leathery flaps might be appearing to be a fabric-like material flowing across and down their shoulders and backs.

What strikes eyewitnesses the most about the physical appearance of a Draco being is their horns. The horns are usually short. They are conical in shape and they extend four to five inches away from the skull.

Some reports describe low boney ridges , running back along their slightly conical heads. These ridges develop midway between the brow and the top of their head.

The Draco types appear to have a much more athletic build than the other reptilian beings. Their upper torsos are extremely

lean and their neck muscles splay out from the base of their jaw to their shoulder blades.

## DRACO PRIME

Certain individuals amongst those claiming Draco encounters, say that they saw a one with white powdery scales, approach and give instructions to the others. In every one of these cases, the greenish-brown Draco beings appeared to be submissive and highly respectful towards the Draco with white scales. This reaction indicated that the Draco hierarchy is a caste system dependent on skin color (and possibly other unknown genetic traits).

Other non-human beings, such as the Greys, have also demonstrated similar respect for the Draco. The general, cross-species respect for the white scaled Draco indicates that they are the elite species in the terrestrial chain of command.

# REPTILIAN-GREY CROSSBREEDS

In addition to the Draco and Reptoids, various crossbreed types have been encountered. Although they vary in shape, size and color, they share common physical characteristics.

Most of the reptilian-grey crossbreeds are rather diminutive in size. They are four to four and a half feet in height. They have oversized craniums, large black eyes with vertical slit pupils, no ears, slight torsos, arms and legs.

There have been reports of these beings as having either three fingers with a fourth opposable, or having only three long fingers. They have been seen to have short claws and in some cases, no claws at all at the tips of their fingers. Some experiencers have described their feet as being short and stubby, with no toes.

Amidst the various reptilian-grey types, there is also a species that has greenish-tan skin. They also have large almond-shaped, gold colored eyes that have a dark, metallic green vertical slit pupil. They are usually seen wearing a one piece suite that is the same color as their skin.

They are telepathic with superior mental powers; they can shapeshift and create illusions; they want to interbreed with humans and need human blood, flesh and reproductive materials; they have advanced technology; they have the secret of immortality; they can fly, either by

themselves or with their technology; they mostly have a malevolent agenda for humans.
