

SUMMARY: SELECT EVIDENCE OF PRESIDENTIAL ELECTION FRAUD 2020

6 EXAMPLES OF VOTER FRAUD

There is now a wide array of empirical evidence that the 2020 election was not like others. Whether you are already believe that there was widespread fraud or you are a skeptic, the purpose of this document is to summarize a snapshot of the most compelling evidence, including: eye-witness accounts and confessions of fraud, technological vulnerabilities, statistical anomalies, voting irregularities, illegal voting, and audits of actual voting machines.

You might be wondering: if there's evidence, why has it not gone through the judicial system? Courts have dismissed the cases without ever hearing the evidence.

This is just a very small set of evidence we have compiled over the course of six weeks, but we are fully convinced that this election was stolen from President Trump and we must do everything possible to defend our Republic. Our weapon is the truth, and our advocate is the Lord.

1) THE CASE OF RUBY FREEMAN

There are many examples of election officials directly participating in voter fraud, but perhaps the most notorious example is in the battleground state of Georgia by Ruby Freeman and her daughter.

An October 26th Facebook live by Ruby Freeman in Fulton County, GA reveals that her daughter brought in suitcases of ballots that were counted after observes were told to leave, corroborating affidavits that flagged 8:22AM as the time these suitcases arrived.

Freeman said “Y’all want to know who my new supervisor is? It’s my daughter.” She added that “I just do what she say do and it’s her show baby, it’s her show.”

IT WAS BALLOT TAMPERING!

In a November 3 Facebook post, Freeman wrote “A lady had a problem with me telling her what a supervisor told me to tell her yesterday. This morning, lo and behold, out of nowhere, she came to give me a hug. You already know the end of that story. Judas, I’m not Jesus. Don’t play. I blamed it on Social distancing.”

Freeman’s daughter is seen as the first to remove the ballots from the suitcases and issuing instructions to the other vote counters, subsequently retrieving a second suitcase of ballots. Although the lawyers she retained changed her Instagram into a parody account, that was a last ditch effort to cover up the truth and is not historically consistent with her previous posts.

2) FOREIGN ADVERSARIES DIRECTLY INVOLVED

FRAUD BY DOMINION VOTING SYSTEMS, EDISON RESEARCH

Dominion Voter Systems and Edison Research were using an unencrypted virtual private network (VPN) that was penetrated by multiple foreign adversaries. [See the affidavit.](#)

IRAN AND CHINA TAMPERING IN US ELECTIONS

The Department of Homeland Security (DHS) released a report on October 30th, 2020 announcing an Iranian advanced persistent threat actor that was targeting state websites to intimidate potential voters and gain access to voter roll data.

Edison Research was using an unencrypted VPN with login credentials that were easily accessible and used by foreign adversaries to monitor and manipulate votes.

The internet protocol (IP) addresses into the “edisonresearch” host server were sent in both directions, meaning that not only were **Iran and China** (and other adversaries) accessing the server, but also the Edison Research server was communicating back to these adversaries.

Edison Research shares a virtual private server (VPS) with BMA Capital Management, which is a known company that provides Iran access to capital markets.

— “ —

CISA and the FBI are aware of an Iranian advanced persistent threat (APT) actor targeting U.S. state websites—to include election websites. CISA and the FBI assess this actor is responsible for the mass dissemination of voter intimidation emails to U.S. citizens and the dissemination of U.S. election-related disinformation in mid-October 2020. - CISA, Oct. 30, 2020*

3) STATISTICAL ANOMALIES

Statistical analysis of the sudden and sharp vote surges for Biden are highly suspect because of their timing and concentration in vital battleground counties.

01

Publicly available data from the New York Times reveals that Biden's lead over Trump in key battleground states, such as Michigan and Wisconsin, were the result of vote drops that occurred in the early hours of November 4th and nearly exclusively for Biden.

04

Four of the seven most anomalous vote updates — that is, updates in which the margin and ratio are co-extreme — are in election-critical states and occurred during the same five hour period where the circumstances on the ground were contested and highly suspicious.

02

Consider the vote update in Michigan at 3:50AM EST on November 4th that delivered 54,497 ballots for Biden and 4,718 for Trump. Another even more anomalous update at 6:31AM EST delivered 141,258 ballots for Biden and 5,968 for Trump.

05

Approximately 15% of the vote updates in the data set of 8,954 were from Michigan, Wisconsin, and Georgia. If we were to assume that any state could have these extreme vote updates, then there would be a 1.2% chance that three states represented in three out of the top four or four out of the top seven spots and a 0.99% chance that these three states would occupy the five out of the top seven spots.

03

Similarly, a vote update at 3:42AM CST on November 4th in Wisconsin delivered 143,379 to Biden and 25,163 to Trump. While there are a few instances where ballot dumps also went to Trump, these were in significantly smaller magnitudes and less frequent.

06

If all four of these vote updates were extreme — but not as extreme — that the difference in margin would be greater than the margin of victory in all three states. ***The media's proclamation of Biden's victory in these states relied on four of the seven most co-extreme vote updates in the entire data set of the whole 8,954 vote updates.***

4) BATTLEGROUND STATES

A new report by Dr. John Lott in the Department of Justice reveals that precincts that the voting patterns observed in Georgia and Pennsylvania are highly anomalous. While comparisons between counties where voter fraud was alleged versus those where it was not reveal significant leads for Biden in 2020, they reveal no such leads in 2016 between Trump and Clinton.

"The estimates here indicate that there were 70,000 to 79,000 "excess" votes in Georgia and Pennsylvania. Adding Arizona, Michigan, Nevada, and Wisconsin, the total increases to up to 289,000 excess votes." - John R. Lott, DOJ, Dec. 21st, 2020

Biden "won" Fulton County GA by 243,904 votes and 86,309 in absentee ballots.

Even though in 2016, there was less than a percentage point difference in the fraction of absentee ballots that went to Trump cast in Fulton versus bordering and highly similar neighboring counties, Trump had a 7.19 percentage point lower share in 2020. Results are robust to controlling for demographic differences, such as race and age.

Biden "won" Allegheny and Philadelphia Counties by 146,706 and 471,305 votes and 206,505 and 310,553 absentee ballots, respectively.

Just as in Fulton County, GA, Trump's share of votes was 3.4 percentage points lower in Allegheny County in 2020. The differences are even higher when looking at absentee and provisional ballots. Put together, there are at least 55,270 extra ballots that went to Biden.

If these differences in fraudulent ballots are incorporated, Trump would win GA and PA.

5) ILLEGAL VOTING

BALLOTS RECEIVED AFTER
ELECTION DAY IN PA

69,004

“INDEFINITELY CONFINED
VOTERS” IN WI

200,000

FELONS VOTING IN GA

2500

UNDERAGE VOTERS IN GA

66,247

UNREGISTERED VOTERS IN GA

2,423

In Pennsylvania, 69,004 ballots were received after election day, (Nov. 3rd), and 19,660 after the 6th. Moreover, out of 161,774 mail-in ballot records that were changed between the November 10th and December 16th version of the data, 116,840 ballots were given new return dates. 69,004 ballots were marked as “returned” after November 3rd despite Pennsylvania Secretary of State Kathy Boockvar reporting on November 10th (and to the Supreme Court on November 30th) that only 10,00 ballots were received after November 3rd.

In Wisconsin, the number of “indefinitely confined voters” surged from under 70,000 voters in 2019 to over 200,000 in 2020.

Social media profiles showed that these voters actually had active lifestyles. The 130,000 increment is over five times the margin that Biden “won” by in the state.

Many states exhibited abnormal turnout rates. For example, cybersecurity expert Russ Ramsland testified in Wayne County that 46 of the 47 precincts where Dominion machines were used had at least a 96% voter turnout rate and 25 of the 47 had a 100% turnout.

In Georgia, affidavits and testimonies revealed that 2,500 felons with uncomplete sentences registered to vote and cast it, 66,247 underage people were registered to vote and illegally vote, 2,423 unregistered people voted, and 10,315 people who voted had died by the time of the election. Many more examples abound.

6) FORENSIC MACHINE AUDIT REVEALS SIGNIFICANT ERRORS

Despite significant opposition and attacks, election security experts were able to audit Dominion Voter System machines in Antrim County, MI, revealing unusually high error and adjudication rates.

According to the report, Dominion Voting System is intentionally and purposefully designed with inherent errors to create systemic fraud and influence election results. The system intentionally generates an enormously high number of ballot errors. The electronic ballots are then transferred for adjudication. The intentional errors lead to bulk adjudication of ballots with no oversight, no transparency, and no audit trail.

Cybersecurity specialists identified an error rate of 68.05%, which is far above the Federal Election Commission guidelines of 0.0008%. The results of these errors led to tabulation errors and ballots being sent to adjudication, which means that the vote is decided by the election worker using the machine ([see here](#)). For example, in Central Lake Township, there were 1,222 out of 1,491 ballots cast that were reversed, producing an 81.96% rejection rate.

Although vote adjudication logs for prior years were available, all the logs for the 2020 cycle were missing. Moreover, all server security logs prior to 11:03PM on November 4th are missing. These logs are vital for audit trails, forensics, and detecting malicious intruders.

The Election Event Designer Log shows that Dominion ImageCast Precinct Cards were programmed with new ballot programming on October 23rd and again on November 5th. That violates the Help America Vote Act, which includes a 90-day Safe Harbor Period that prohibits changes to election systems, registries, hardware/software updates without undergoing re-certification.

Even if skeptics and critics win that there are limitations of the aforementioned audit, they should offer a random sample of machines in other battleground states for third-party review. In contrast, they have viciously attacked attempts to review machine logs and have even endeavored to wipe the machines in Georgia before the runoff.

WHAT YOU CAN DO

1) FLOOD social media with the truth! They can't stop us all at once! Use hashtags: #HereIsTheEvidence #EveryLegalVote #LetJusticeRoll #StopTheSteal

2) Put pressure on state and local officials. Call and email them to voice your concern and decertify the fraudulent vote.

3) Pray for the President and the team!

**GOD BLESS YOU,
AND GOD BLESS
THE UNITED STATES
OF AMERICA**
