

SORA Approvals Made Simple

Enabling Drone Operations for Emergency Services and Councils – Clear of CAA Complexity

The Problem

Emergency services and councils are slowed by complex CAA approvals, risk assessments, and SORA paperwork which can be blocking life-saving and community-focused drone operations.

The Solution

SkyClear removes the red tape. We plan, write, and run your SORA to secure the right permissions fast — so teams can fly legally and confidently during routine and time-critical deployments.

Top 5 SORA Myths

- “Controlled ground area always means low risk.” – Not without the right mitigations.
- “Flying near roads is automatically prohibited.” – Feasible with proper controls and evidence.
- “SORA is only for big commercial ops.” – Public services rely on it too.
- “The CAA won’t approve us quickly.” – Strong applications move faster.
- “It’s too complicated to bother with.” – That’s what we simplify.

Talk to us today – we’ll make your drone approvals simple.
