

**Sky Fine Foods** in collaboration with **J Spot Gallery** present:  
**Carson Teal, *Sentient Windows***  
February 19 - April 12 2022

Sky Fine Foods is honored to present **Carson Teal: *Sentient Windows*** as a multi-dimensional solo exhibition, virtually in our Art Gate VR Gallery and organically in collaboration with J. Spot Gallery at 240 Queen St. East Toronto.

***Sentient Windows*** features a new body of work consisting of looping videos, moving images, printed stills, and installation. Each work is a fusion of digital, artificial, and hand-drawn methods that intertwine; emerging as resonating organic mirages and nuanced figments of digital dreams. A keen interest in ancient symbologies inspired Teal to create a language of glyphs, a layered ideography without semiotic purpose. Teal seamlessly involves hand-created elements within a mastery of digital methods, resulting in sophisticated ethereal textures that glimmer and evolve in each of the works.

Teal works within a global language of forms. A symbology derived in hybridity between digital and physical, where movements and mirages flicker, imbued with meaning that intentionally evades grasping.

**Carson Teal** is an accomplished Canadian multidisciplinary visual artist and experimental producer based in Tkaronto/Toronto.

Teal is known for eloquent use of visuals and audio, creating moments and environments that transcend the confines of physical space. Teal interlaces hand-drawn elements, lens flares, pixels, AI frames, symbologies, and found objects within rich complex digital textures and elements of video projection to create immersive and mesmerizing atmospheres. Each work recalls a dream or fleeting recollection laden with nostalgia - memories familiar to the senses yet just out of articulation's reach.

Teal's multi-disciplinary practice creates an opportunity to be fully present in the moment, where a memory can be recalled within a myriad of senses.

***Sentient Windows*** invites the viewer to linger in each work, fabricating an exquisite and tenuous space where there is fusion between realities and expectations.
