

Winners Announced for Aviation Week's Annual Laureate Awards

Aviation Week & Space Technology

Nov 14, 2018

Aviation Week & Space Technology announces the winners for the Aviation Week Network's 62nd Annual Laureate Awards, honoring extraordinary achievements in the global aerospace arena.

DEFENSE

MRO: U.S. Air Force, Moog and South Dakota School of Mines and Technology

The U.S. Air Force's 28th Bomb Wing is using cold spray, a technology developed by the Army Research Laboratory, to repair the B-1 bomber, saving the service about \$225,000 per panel. Cold spray blasts metallic powder into the substrate so forcefully that it bonds to the existing metal.
