Subject: Air Force White Paper - 2005
Attachments: White Paper.pdf; MILCON Projects 02-05.xls

Art, please note on page 7, the following AF quotes written in 2005 consistent with General Loh's remarks on consolidation and the anticipated effects of congestion and overburdening of the Dyess infrastructure:

“As we alter basing, we must ensure that we do not load a base to the point where we cannot conduct deployment and surge operations, evacuate quickly for natural disasters, or accommodate routine repair activities.”

“We require access to ground water, the electromagnetic spectrum, and clear areas surrounding air and space operations. Overloading a base may jeopardize the availability of these resources.”

Also attached is a summary of Ellsworth MILCON.
