**Subject:** Dyess Material

Art and the commission will be required to eventually put to any documents given to him during his site visit to Dyess in the BRAC website library. Same for those range charts the Dyess folks used in San Antonio. Other material that may useful to us – or that we need to refute – may have been given to the commission and already posted. Can you guys have someone on your staff search the website especially for the charts used in San Antonio and those maps Beachamp was waving around yesterday? I will also have someone begin looking from here.
