

OPERATION GUARDIAN EXODUS

Point Paper | CS2 | NEO

Multi-national NEO under a State / DoD JTF. Quadraux provides hybrid PM, cyber, and logistics as complementary surge, not a replacement for State or DoD components. Illustrative \$5.2M over 28 days plus post-extraction stabilization. Time, Cost, Scope, and Value held.

ALIGNING TIME, COST, SCOPE, AND VALUE.

Illustrative scenario. Not a prior Quadraux engagement.

SNAPSHOT

Client	State / DoD JTF: NEO planning and execution
Scenario	Rapid extraction of civilians and diplomatic personnel from a high-threat contested region.
Estimate	\$5.2M (competitive lower-end). 28 days intense plus post-extraction stabilization.
Quad	Time, Cost, Scope, and Value held as four peers.

OUTCOMES

Illustrative scenario numbers.

- **Cost.** 21% under the \$5.2M figure (~\$1.1M).
- **Time.** 12 days ahead on critical extraction windows. ~35% faster planning-to-execution cycles.
- **Scope.** Last-minute evacuee growth and changing threat conditions absorbed without loss of control.
- **Value.** ZERO successful disruptive cyber incidents. Complete audit trail for 120,000+ extracted.

APPROACH

- **D.I.M.E.** Strategic frame synchronized against Time, Cost, Scope, and Value across the 28-day campaign.
- **Coordination cell.** Secure multi-national cell and common operating picture stood up within 48 hours.
- **Zero Trust.** Continuous verification, micro-segmentation, and encrypted communications from the first movement window.
- **Hybrid PM.** PMBOK gates plus Agile/PMI-ACP sprints. Delivery method, not a seventh service line.
- **AI/ML.** Predictive routing, identity assurance, and decision support designed in from the first planning sprint.

RECOMMENDATIONS

Hybrid Project Management at Evacuation Tempo

- **Recommendation.** Hold PMBOK gates for risk, cost, and accountability. Run daily Agile sprints so extraction windows can move without losing the audit trail.

Zero Trust Identity Assurance at Scale

- **Recommendation.** Stand up Zero Trust and AI-supported biometric screening at processing nodes from the first movement window.

Multinational Alignment in the First 48 Hours

- **Recommendation.** Stand up a secure multi-national coordination cell with a common operating picture inside 48 hours.

Predictive Logistics Under Threat

- **Recommendation.** Apply predictive routing and real-time intermodal visibility from alert forward.

WHEN CRISIS STRIKES. PREPARED. PROTECTED. CONNECTED. RESILIENT.
