

Watersedge H Condominium Door Key Requirements

Emergencies such as broken pipes or air conditioner failures can occur at any time with the possibility of water infiltrating your neighbors units or the development of mold. If someone who lives alone has fallen ill and has not been seen in a while or a relative asks for a wellness check, we need to have access to your unit.

All owners of a condominium unit at Watersedge H at the Lakes of Delray should provide the Board of Directors with a key or combination to the front door lock of their unit in case of such an emergency. This key or combination is kept under lock and key and can only be used in the presence of 2 board members.

Anyone who does not wish to comply with this request, must sign below, confirming that they will be responsible for any damage done to their unit should force be required to gain access.

Date	Unit #	Name	Signature
