

EXPRESS Elevator

Inside the elevator, attorney Odeim was about to select the last button on the board, when an agitated voice caught his attention. The screams coming from the hallway were from the philosopher Lose Todo.

“Wait for me, wait for me...”

Demons in their natural environment do not get tired or fatigued like humans, but in their artificial biological body they have limitations. That's why his tone felt agitated and breathless. The philosopher, exhaled intensely, entered the elevator and, visibly exhausted, leaned against the wall while he tries to recover his strength. He also, being a member of the Advisory group, received an invitation to the emergency meeting in the Room of Hidden Secrets.

His accelerated heartbeat and the thick drops of sweat from his face, confirm that he is about to collapse. These limitations, of the artificial biological body, are a serious discomfort. All demons are divided into four levels; Rulers, Authorities, Powers and Forces of Evil (Note: 1). Only the Rulers can manipulate the molecules to possess an artificial biological body as desired. The Authorities and the Powers need the drug (Neu) (Note 2) to obtain an artificial biological body. The forces of evil cannot possess an artificial biological body, but they manage to inhabit human bodies (Note 3).

“Are you okay?” asked the lawyer.

The philosopher nodded with his head that he was fine. Then he raised his right hand and showed the piece of paper. The note is identical to the one that the lawyer received, inviting him to the emergency meeting, in the Room of Hidden Secrets.

The «Express» elevator is the only elevator that goes down to the lower levels, where the Room of Hidden Secrets is located. The security measure is designed so that no one with a "soul" can descend

into the darkest room.

Three security measures: The magnetic card, optical retina reader and infrared sensor.

First security measure: Magnetic card to activate the elevator. All the employees of THE CONSORTIUM, who belong to the kingdom of darkness, have their magnetic identification card. The EXPRESS elevator is activated when the identification card is swiped through the optical reader.

Second security measure: «retina biometric» reader. This instrument uses advanced technology to analyze the capillaries in the back of the eyeball. The machine can tell the difference between a human and a creature with an artificial biological body.

Third security measure: Infrared rays sensor. A blanket of light, made up of infrared rays, descends from the top of the elevator to the floor. It looks like a mesh of light. When descending, it scans the biological body and measures its heat. The sensor creates a figure that reflects color. The artificial biological body reflects two colors while the human body reflects three colors. In total there are three basic colors: orange, white and blue.

The orange color is related to the physical body, the white with the spirit and the blue with the soul. When the infrared sensor identifies blue, it stops the elevator, because no one with a soul can go to the lower levels.

Only humans possess body, spirit and soul (see note 4).

The control panel indicates that the elevator must make four stops before going to the lower level. As soon as the system confirmed the absence of blue light inside the elevator, the descent began. The philosopher repeated...

“I knew... that something wasn't... right”.

On this occasion... He kept saying...

“Do you have any idea what the emergency meeting is about?”

Although they don't know the details, they both agree that something big and dangerous has happened, being that an emergency meeting is called during the Gala Ball.

“Do you have any idea?” asked the philosopher.

“Not the slightest idea,” replied the lawyer, shrugging his shoulders.

The descent on the elevator was quick, but smooth. The hydraulic brake system on this sophisticated machine is extremely efficient. It causes the elevator to slow down and stop without anyone noticing. No sudden movements! The first stop is at the “High Management” reception room.

When the elevator doors opened, the engineer Casi Puedo, who is part of the group of ADVISERS, entered. He falls into the phlegmatic group, because of his calm temperament and his nickname is CP. This demon doesn't lose his composure easily, which is why he almost never gets angry.

As soon as he entered the elevator, he asked:

“Did you hear the rumor?”

These words triggered curiosity in the lawyer and intrigue in the philosopher.

Notes:

1. Different levels of demons. "For our fight is not against human beings, but against powers, against authorities, against powers that dominate this world of darkness, against evil spiritual forces in the heavenly realms" [Ephesians 6:12].
2. Neu: Drug obtained from the protein neuropsin. This protein is produced

by the body, when facing moments of pain or nervousness (stress).

2. The Bible gives several examples of people who were possessed or influenced by demons. "While they were leaving, they brought him a demon-possessed mute. So Jesus cast out the demon, and the one who had been dumb spoke. The crowd marveled and said: "Nothing like it has ever been seen in Israel"" [Matthew 9:23].

3. Only human beings have a body, spirit and soul (see note 3). It is written: "May God himself, the God of peace, sanctify you wholly, and keep your whole spirit, soul, and body blameless at the coming of our Lord Jesus Christ" (1 Thessalonians 5:23)
